# INTRODUCTION AND SUMMARY

## ***Village of River Forest***

### ***Five Year Capital Improvement Program***

---

All Village programs and services are provided with three guiding principles in mind: providing a safe community, protecting property values in River Forest, and working to stabilize property taxes. The Village's annual budget is prepared by Village Staff and approved by the Village Board in service of those guiding principles and understanding that sound management of its finances, resources, and infrastructure is key to ensuring the long-term health of the organization and community.

The Five Year Capital Improvement Plan is prepared by Staff and reviewed by the Village Board as the initial step toward preparing the annual budget. The Plan is generally amended during the budget process as determinations are made for items to be moved forward or deferred based on current information. The Five Year Capital Improvement Program (CIP) is a planning tool for the Village that seeks to identify major capital projects and a corresponding funding source for projects that are \$10,000 or more.

#### **Buildings and Improvements**

*Number of Existing Facilities: 3*

Village facilities include Village Hall, which houses Administration, Finance, Building, Police, and Fire operations, the Public Works Garage, and the Water Pumping Station, which are located in separate facilities.

#### **Vehicles**

*Number of Vehicles in Fleet: 49*

The Vehicles section includes all Village vehicles subdivided into building, police, fire, and public works vehicles. The detail page for each vehicle to be replaced within this five-year Capital Improvement Plan provides a photo of the vehicle, historical cost, repair information, a description of how the vehicle is used, and its life expectancy.

#### **Equipment**

The Equipment section lists the capital equipment items that need to be repaired, replaced, or acquired over the next five years. This section includes equipment for the Police, Fire, and Public Works operations.

#### **Information Technology**

*System Equipment: Approximately 100 computers/tablets, one physical server and several virtual servers*

The Information Technology (IT) section includes hardware, software, equipment, licenses, and consulting costs for supporting the robust computer network that supports the Village's day-to-day operations.

#### **Streets, Sidewalks, Alleys**

*Miles of Streets/Sidewalks/Alleys: 31.6 miles*

The Streets program includes annual street resurfacing, alley maintenance, sidewalk, curb maintenance, and general street patching and maintenance. The annual Street Improvement Program is funded through Motor Fuel Tax (MFT) revenues. The CIP also includes the REBUILD Illinois and Harlem Ave. Bridge Study projects, funded through one-time IDOT and DCEO grants, respectively.

#### **Water and Sewer Improvements**

*Miles of Water/Sewer Mains: 76.5 miles*

The Village annually budgets for the maintenance and repair of the sewer system, including sewer lining, rehab, and main repairs. The Village's water system serves a population of more than 11,000. Maintenance of the pumping station and distribution system is essential to the water utility's operation. Annual funding is recommended for water main replacement and rehabilitation. Water main replacement is recommended when a history of line failure or inadequate fire flow exists. Fire flow is the quantity of water available for fire suppression purposes over that which is required for other purposes. When possible, water main replacement is scheduled to coincide with street improvements to limit the impact of construction activity on a particular area. Equipment improvements at the Water Pumping Station can be found in this section.

## ***Village of River Forest***

### ***Financing the Five Year Capital Improvement Program***

---

The Five Year Capital Improvement Program (CIP) is financed through the following Village funds or particular revenue sources. The individual project sheet will indicate when the project is funded from a specific revenue source, such as a grant, within the fund. The proposed FY 2025 funding levels for each fund or source can be found below.

**General Fund** **\$ 322,168**

The General Fund is the primary operating fund in the Village's budget and provides for all activities not accounted for in other funds.

**Motor Fuel Tax (MFT)** **\$ 1,186,279**

The State of Illinois has imposed a gas tax on the privilege of operating motor vehicles on public highways in Illinois. MFT dollars are collected by the State of Illinois and remitted to the municipality on a per capita basis.

**Water & Sewer Fund** **\$ 3,152,000**

The Water and Sewer Fund includes the following revenue sources which assist in funding capital improvements: water and sewer charges, interest income, and bond proceeds.

**Capital Equipment Replacement Fund (CERF)** **\$ 1,360,990**

The Capital Equipment Replacement Fund (CERF) is a capital projects fund where Administration, Police, Fire, and Public Works Departments set aside funds each year to eventually replace existing equipment and vehicles and avoid significant fluctuations in the operating budget from one year to the next. Revenues are provided by transfers from the General and Water and Sewer Funds.

**Water & Sewer - CERF Fund** **\$ 457,500**

The Water & Sewer - CERF Fund is part of the above-mentioned CERF; however, only this portion is funded from Water & Sewer revenues and provides for the eventual replacement of Public Works vehicles utilized for sewer and water functions.

**Capital Improvements Fund** **\$ 929,021**

The Capital Improvements Fund is used to account for improvements to buildings, parking lots, municipal lighting systems, alleys, streets, and information technology. Revenue sources include red light camera revenue, parking lot fees, ambulance fees, grants, and transfers from other funds.

**Infrastructure Improvement Bond Fund** **\$ 300,000**

The Infrastructure Improvement Bond Fund is a fund that utilizes the proceeds from the 2024 General Obligation Bond issued using the Village's available debt service extension base. These funds may be used to finance the Street Improvement Project.

**North Avenue Tax Increment Financing (TIF) District Fund** **\$ 133,903**

The North Avenue TIF is a fund that utilizes the North Avenue TIF District proceeds to pay for TIF-eligible projects.

# BUILDINGS AND IMPROVEMENTS

## ***Buildings and Improvements – Five Year Capital Improvement Program***

---

The Buildings and Improvements section of the Capital Improvement Program (CIP) identifies proposed improvements to the Village Hall, including the Police and Fire Department areas and the Public Works Garage and Water Pumping Station. Proposed improvements may include repair, replacement, or the rehabilitation of Village buildings.

As with other sections of the CIP, these improvements are targeted for specific years and financed through various methods such as the General Fund, Water and Sewer Fund, Capital Equipment Replacement Fund, and the Capital Improvement Fund (CIF).

Improvements planned for FY 2025 include:

| <b>Improvement</b>        | <b>Cost of Improvement</b> | <b>Funding Source</b> | <b>Nature of Project</b> |
|---------------------------|----------------------------|-----------------------|--------------------------|
| Village Hall Improvements | \$ 437,000                 | CIF/CERF              | Recommended              |
| Fire Station              | \$ 45,000                  | CIF                   | Contingent               |
| Garage Improvements       | \$ 100,000                 | CIF                   | Contingent               |
| PD Renovations            | \$ 65,950                  | CIF                   | Contingent               |
| Solar Installation        | \$ 35,000                  | WS                    | Contingent               |
| <b>Total</b>              | <b>\$ 682,950</b>          |                       |                          |

**Each project in the CIP is categorized by the requesting department as follows:**

**Critical-** The project must be completed in the year recommended due to safety or operational needs or as mandated by law.

Critical projects are highlighted in yellow.

**Recommended-** The project will significantly improve operations or safety. The project is strongly recommended for funding in the year recommended or the year after.

**Contingent on Funding-** The project would benefit the Village and improve service levels but is only recommended if funds are available.

**Project Description & Justification**

The Firing Range located in the basement of Village Hall was installed in 1998 as part of the Village Hall construction project. In FY 2016 and 2017, the Firing Range was updated. However, due to supply chain shortages and lead times, the FY 2023 update was delayed until FY 2024 and completed. The range is used over 200 times per year for handgun, shotgun, rifle, and less lethal training. The Village’s range requires upgrades in the bullet trap system, ventilation, and the target rail systems. With local, regional, and national focus on police officers' use of firearms, this project will help ensure that the Village maintains professional standards and safeguards the public’s trust. Use of force, judgment, de-escalation, and scenario-based training are part of a defensible firearms training program.

The main components of the range are the following:

- Bullet Trap/Ballistic/Protective Wall System
- Ballistic Ceiling Baffle System
- Shooting Stalls/Target Turning Systems - stalls, rails, target retrievers, and master control system
- Range Ventilation System

| <b>Repair/Improvement</b>                 | <b>Estimated Cost</b> | <b>Fiscal Year</b> |
|---|-----------------------|--------------------|
| Ventilation Direct Digital Control System | \$ 19,371             | FY 2026            |
| Ventilation VFD for Make-Up Air Unit      | \$ 3,862              | FY 2026            |

| Air Filtration Unit                       | \$ 44,111             | FY 2043            |

|                           |    |                |  |
|---------------------------|----|----------------|--|
| FY 2026 Sub-total         | \$ | 55,538         |  |
| FY 2033 Sub-total         | \$ | 92,055         |  |
| FY 2038 Sub-total         | \$ | 62,839         |  |
| FY 2043 Sub-total         | \$ | 100,458        |  |
| <b>Total Project Cost</b> | \$ | <b>310,890</b> |  |

The approximate life expectancy of the equipment, with recommended maintenance, is an additional 10 to 20 years.

**Additional Justifications**

**FY 2026** - Improvements will address most ventilation system upgrades needed to ensure compliance with the most recent OSHA air quality standards for firing ranges. The current system is using a software system that has limited to no support capabilities. Therefore, this portion of the project was moved from FY 2028 to FY 2026.

**FY 2032** - Improvements will address the safety and integrity of the bullet trap system and industry-standard ballistic walls for approximately 1/3 of the range to protect against ricochet and shrapnel displacement. Items include upgraded ceiling baffles to protect plumbing, ductwork, and other structural components. Further improvements will address mechanical and technology upgrades required concerning target rail and master control systems.

**FY 2038** - Equipment was replaced in FY 2024. Master control system and target turning systems are anticipated to need replacement in FY 2038.

**FY 2043** - Improvements will address most ventilation system upgrades needed to ensure compliance with the most recent OSHA air quality standards for firing ranges.

**Project Alternative**

The alternative to replacing the range equipment is to continue to repair the current system, which is less desirable and less feasible as the range age increases. Key components and mechanical parts are not available in new condition or on the secondary rebuilt market. The proposed improvement costs are based on estimates from current contracted vendors. The utilization of alternate vendors would require the complete stripping out of all or most current equipment, increasing costs by approximately 40% to 50%. A second alternative would be to lease time at an offsite firing range; however, concerns regarding this alternative are discussed below.

**Project Impact**

The State of Illinois requires annual firearms certification plus additional training in other weapons tactics. The use of a firearm is one of the highest liabilities a police department can face. The Department currently requires quarterly firearms training. Without a usable firing range, Village Staff must seek an alternate location to train, which would increase training, overtime, transportation, facility rental premiums, and ammunition costs. A safety/operational concern would be officers' inability to test-fire duty weapons after general maintenance or armorer repairs. The Department continues to look for other like-sized departments to potentially lease time for use. Ongoing project support will improve department range operations' overall efficiency and effectiveness.

| <b>Annual \$ Impact on Operating Budget</b> | <b>Description of Operating Budget Impact</b> |
|---|---|
| \$4,000                                     | Minimal-Ongoing Cleaning and Maintenance      |

**Project Description & Justification**

The Village Hall, located at 400 Park Avenue, was constructed in 1999. It houses the Village’s administrative Staff, the Police and Fire Departments, and the West Suburban Consolidated Dispatch Center (WSCDC). The majority of janitorial and maintenance tasks and operations are performed and coordinated by the Village’s Custodian. Tasks and functions that cannot be performed by in-house Staff are outsourced.

The emergency generator at Village Hall was installed in 1998 and has reached the end of its 25 year life cycle and is scheduled for replacement in FY 2025; replacement of this generator is critical for all Village Hall operations.

The working condition of all Village Hall HVAC units are continually monitored. Staff have identified the RTU servicing for the fire house and dispatch center as being in need of replacement. Staff also intend to have an HVAC contractors perform an assessment in order to more comprehensively determine what replacements and upgrades are needed in the next five years.

A building envelope and roofing assessment were conducted in 2016 by the Garland company to provide thermal scans of the roof’s condition. This report recommended roof replacement for this facility in FY 2017. Since then, all sections of the roofing system have been replaced with the apparatus bay roofing system replacement performed in FY 2024. Final building envelope improvements, such as tuck pointing, are scheduled to be completed in FY 2026

The following facility improvements are recommended within the next five years with higher priority items listed first:

| Repair/Improvement             | Estimated Cost | Year    |
|--------------------------------|----------------|---------|
| HVAC Evaluation                | \$20,000       | FY 2025 |
| RTU Replacement                | \$100,000      | FY 2025 |
| Replace Emergency Generator    | \$317,000      | FY 2025 |
| Building Envelope Improvements | \$50,000       | FY 2026 |
| Total                          | \$487,000      |         |

| FY 2020 | \$0 |

### Project Description & Justification

The Fire Station, located at 400 Park Avenue, is the facility that houses all firefighting and EMS vehicles, equipment, living quarters for Firefighter/Paramedics, file storage, office space, and supplies necessary for Fire Department Operations. All janitorial and minor maintenance tasks and operations are performed and coordinated by Fire Department personnel. Tasks and functions that cannot be performed in-house are outsourced. The replacement of the roof above Truck 219's bay was completed in FY 2024. The replacement of floor and wall coverings in the office areas are scheduled for FY 2025. Remodeling of the firefighter's bunkroom is scheduled for FY 2026. Painting of the four overhead doors and two service doors is scheduled for FY2027.

Based on current conditions and a facility site assessment, the following facility improvements are recommended within the next five years with higher priority items listed first:

| Repair/Improvement                                   | Estimated Cost    | Year    |
|--|-------------------|---------|

**Project Description & Justification**

The Village Hall and Police Department were constructed in 1998. The locker rooms, roll call room and south garage maintain the same materials and equipment that were installed at that time. The locker rooms need to be replaced as some are in disrepair. The equipment and technology needs of police officers have significantly changed since the building construction. Similarly, the roll call room is in need of a new mail sorting area, equipment storage, office furniture, and a smartboard to replace the existing whiteboard. The south garage area is used to store vehicle maintenance equipment and officer equipment. The current storage has deteriorated and is no longer sufficient for the intended purpose. Other areas of the Village Hall and Police Department have been renovated and had furniture replaced in recent years.

The health and wellness of Village employees is extremely important. Any initiatives that can be taken to improve the well-being of employees and allow them to perform their jobs to the best of their abilities is strongly encouraged. The storage needs of the Department and personnel have changed since the building's initial construction. The renovations will improve operational efficiency and allow personnel to better serve the community.

The main components of the renovation are the following:

- Locker Rooms
- Roll Call Room
- South Garage Storage

| <b>Roll Call Room</b>                | <b>Estimated Cost</b> | <b>Fiscal Year</b> |

\* estimated

### Project Alternative

The alternative to replacing the lockers is to continue to repair the current lockers that were manufactured in the early 1990s, which is less desirable than replacing them. Key components and mechanical parts are not available due to the age of the lockers. The lockers were not designed for everyday use by law enforcement use and have limited functional storage space. The alternative to replacing the floor tile and fixtures is to keep the twenty-five year old deteriorating infrastructure. The roll call furniture, which includes tables and chairs are past their intended useful life. An alternative is to continue to use the furniture which is used daily by all officers. The alternative for replacing the current white board in roll call is to continue to use the current white board without the additional benefits of a smart board. The alternative to replacing the current mailbox storage unit is to continue to use the twenty-five year old unit which is in disrepair. The alternative to replacing and adding additional storage in the south garage is to continue to use the current storage units. These units are in disrepair and were not intended for daily use by law enforcement.

### Project Impact

This project will improve the overall operations and efficiency of the department. The renovations of this aging infrastructure will improve the everyday working conditions of all department members. This will also have a significant positive impact on morale, mental health of the employees and overall working environment for all department members.

**Project Description & Justification**

The Public Works Garage, located at 45 Forest Avenue, is the facility that houses all vehicles, equipment, fuel (unleaded and diesel), road salt, other materials (stone, asphalt, topsoil, etc.), and supplies necessary for Public Works Operations and Water/Sewer Divisions. Most janitorial and minor maintenance tasks and operations are performed and coordinated by Public Works personnel. Tasks and functions that cannot be performed in-house are outsourced. The rebuild of the salt storage shed was completed in FY 2024. The replacement of one overhead garage door and the front entry keypad are scheduled for FY 2024. Remodeling of the bathroom, interior repainting, and furniture replacement are scheduled for FY 2025.

Based on current conditions and a facility site assessment, the following facility improvements are recommended within the next five years with higher priority items listed first:

| FY 2021 | \$3,700 (Repairs to backup generator)                              |
| FY 2020 | \$54,289 (Relocation of ComEd transformers to outside of building) |

**Project Description & Justification**

The Pumping Station, located at 7525 Berkshire Street, is the facility that houses all pumps, piping, valves, and auxiliary equipment (including the SCADA controls) that are all central and critical to the operation of the Village's water distribution system. The majority of janitorial and minor maintenance tasks and operations are performed and coordinated by Water Division personnel. Tasks and operations that cannot be performed in-house are outsourced.

An evaluation of the energy efficiency of the building was performed by ComEd in FY 2019 to assess if there are any improvements to electrical systems/fixtures that would increase efficiency and be eligible for their incentive program. LED lighting upgrades were performed as a result of this analysis on the interior lighting of the building. A Facility Condition Assessment of the Pumping Station was performed to evaluate the overall condition of the buildings and sites, and provide information regarding the condition and life expectancy of the major components. The report summarizes the recommended projects involving improvements and maintenance to this facility. A Caterpillar 3400 500KW Diesel Emergency Generator and Switch Panel were purchased in FY 1988 and are on year 35 of their 40 year useful life. Replacement of the generator and switch panel are anticipated for FY 2028 and are estimated to cost approximately \$220,000. Reflooring of the pump station basement is anticipated for FY 2029.

| Repair/Improvement                   | Estimated Cost | Year    |
|--------------------------------------|----------------|---------|
| Emergency Generator and Switch Panel | \$220,000      | FY 2028 |
| Refloor basement                     | \$20,000       | FY 2029 |
| Total                                | \$240,000      |         |

**Project Description & Justification**

The Village Board has expressed interest in installing solar panels on Village property. Because the electricity at Village Hall and the Public Works Garage are paid through the Village's franchise agreement with ComEd, the best location would be the Pumping Station at 7525 Berkshire. The option that has been suggested by board members is a solar flower, a ground mounted retractable solar panels that can track the sun, allowing for greater electricity generation than standard rooftop mounted solar panels. Solar flowers systems, including on-site battery storage, typically range from \$25,000 to \$30,000 to install, but some models can cost up to \$65,000. Generally, these solar installations can generate between 3,400 and 6,500 kilowatt hours of electricity per year. While this would not fully offset the cost of electricity at the Pumping Station, which typically uses over 20,000 kilowatt hours of electricity per month, on-site solar is considered the optimal source of green energy and reduces the amount of electricity the Village would need to purchase.

# VEHICLES

## **Vehicles – Five Year Capital Improvement Program**

The Village of River Forest recognizes the importance of maintaining, replacing, and purchasing new vehicles to guarantee public safety and the efficient delivery of services. The following is a breakdown of current vehicular levels for all vehicles owned by the Village and the replacement schedule for FY 2024:

| <b>Department</b> | <b>Number of Vehicles to be Replaced in FY 2025</b> | <b>Cost of Vehicles to be Replaced in FY 2025</b> | <b>Total Number of Vehicles in Fleet</b> |
|-------------------|---|---|--|
| Building          | -   | \$ -  | 1  |
| Police            | 1   | \$ 65,407   | 18                                       |
| Fire              | 1   | \$ 235,417  | 9  |
| Public Works      | 6   | \$ 1,000,000                                      | 21                                       |
| <b>Total</b>      | <b>8</b>  | <b>\$ 1,300,824</b>                               | <b>49</b>                                |

### **Financing**

Projects in this section are financed through the Capital Equipment Replacement Fund (CERF).

**Each project in the CIP is categorized by the requesting department as follows:**

**Critical-** The project must be completed in the year recommended due to safety or operational needs or as mandated by law.

These projects are highlighted in yellow.

**Recommended-** The project will significantly improve operations or safety. The project is strongly recommended for funding in the year recommended or the year after.

**Contingent on Funding-** The project would benefit the Village and improve service levels but is only recommended if funds are available.

### Vehicle Description

This vehicle is utilized by the Building Official and Code Enforcement Officer for travel to/from various properties, primarily for inspections. This vehicle is a candidate for replacement with an Electric Vehicle.

|                            |                   |
|----------------------------|-------------------|
| <b>Total Vehicle Miles</b> | 8896 as of 1/8/24 |
|----------------------------|-------------------|

| Maintenance Costs  | Cost            |
|--|-----------------|
| Axle Replacment, Oil Change, and Tire Rotation - 9/16/21 | \$456.09        |
|  |                 |
| <b>Total</b>   | <b>\$456.09</b> |

### Project Alternative

- Sell this vehicle or move it to the Village's fleet of pool cars and replace it with an electric vehicle alternative, consistent with Village's sustainability goals.
- Utilize a car that is being taken out of the police, fire or public works fleet (if available) as a pool car instead of purchasing a new vehicle.
- Examine possible leasing strategies in lieu of purchasing a new vehicle.
- Defer vehicle replacement given its low mileage and low maintenance costs.

### Operational Impact

This unit is the primary vehicle for the Building Department. Historically the Department has relied on fully depreciated vehicles as "pool cars" shared with other Departments and will continue to do so. The Ford Focus has had minimal maintenance and no performance issues, and replacement can be deferred.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact          |
|--------------------------------------|---|
| \$500                                | Routine Annual Maintenance and periodic repairs |

### Carryover History

This vehicle was scheduled for replacement in FY 2020; however, due to its low mileage, condition, and low maintenance costs, the replacement has been deferred to FY 2026.

| Current Life            | 0 years                        |  |   |             |

### Project Description & Justification

The vehicle's estimated cost incorporates \$19,238 for equipment and installation, including exterior police markings, a light-emitting diode (LED) light bar, and miscellaneous items needed to facilitate the installation of major components. The replacement vehicle was received in February 2023 but needed to be replaced due to damage. The current vehicle was received in FY 2024 (September 2023) and is awaiting delivery and installation of equipment. The mileage is 0 as of 12/12/23. The average monthly miles driven is 1,000. Estimated mileage at the time of replacement: 60,000.

### Vehicle Description

This vehicle is a marked squad car used for daily patrol activities. The unit is equipped with laptop computers, moving radar units, and forward-facing video cameras. As the vehicles are rotated out of the fleet, the laptops, radars, and video equipment will be removed and reinstalled in the new cars. This vehicle also houses mission-critical equipment for response to active shooter and other life-threatening events.

| Maintenance Costs                                  | Average Cost<br>per Repair |   |
|--|----------------------------|---|
| Routine Maintenance since September 2023           | \$0.00                     | 0 |
| Cost of Repairs While Under Warranty (3-yr/36,000) | \$0.00                     |   |
| <b>Total Spent on Maintenance and Repairs</b>      | <b>\$0.00</b>              |   |

### Project Alternative

Due to the nature of the use, deferral beyond three years is not recommended for patrol vehicles. The reliability decreases as age increases, and maintenance and repair costs often increase. Major vehicle manufacturers continue the development of Hybrid and/or All-Electric Vehicles for law enforcement patrol use. As their availability expands, the availability of the equipment needed to outfit the vehicles for patrol use will also need to expand. The price of these vehicles is high compared to traditional vehicles, but the price may reduce when the supply increases. The FY 2029 cost assumes the funding requirement anticipated for purchasing an All-Electric Vehicle. The Village will also pursue grant funding for the electrification of its fleet.

### Operational Impact

These cars are used extensively for daily patrol activities, so breakdowns directly impact the department's ability to respond to requests from residents, provide traffic control, respond to complaints of criminal activity, and perform routine investigations.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |
|--------------------------------------|--|
| Approximately \$3,890                | Routine maintenance and periodic repairs |

### Carryover History

None.

### Project Description & Justification

The vehicle's estimated cost incorporates \$19,238 for equipment and installation, which includes exterior police markings, a light-emitting diode (LED) light bar, and miscellaneous items needed to facilitate the installation of major components. The vehicle was inservice as of October 2022. The mileage is 30,575 as of 12/1/2023. The average monthly miles driven is 2,050. Estimated mileage at the time of replacement: 60,000.

### Vehicle Description

The recommended replacement model is a larger vehicle, such as a SUV. This vehicle serves as a multi-purpose utility vehicle for deploying the speed trailer and rapid deployment equipment. The vehicle houses the Automatic License Plate Reader System (ALPR), used for traffic and parking operations. This vehicle will be a marked squad car used for daily patrol activities. The unit is equipped with laptop computers, moving radar units, and forward-facing video cameras. As the vehicles are rotated out of the fleet, reusable laptops, radars, and video equipment will be removed and reinstalled in the new cars.

Due to the nature of the use, deferral beyond three years is not recommended for patrol vehicles. The reliability decreases as age increases, and maintenance and repair costs often increase. Major vehicle manufacturers continue the development of Hybrid and/or All-Electric Vehicles for law enforcement patrol use. As their availability expands, the availability of the equipment needed to outfit the vehicles for patrol use will also need to expand. The price of these vehicles is high compared to traditional vehicles, but the price may reduce when the supply increases. The FY 2029 cost assumes the funding requirement anticipated for purchasing an All-Electric Vehicle. The Village will also pursue grant funding for the electrification of its fleet.

### Operational Impact

These cars are used extensively for patrol activities, so breakdowns directly impact the department's ability to respond to requests from residents, provide traffic control, respond to complaints of criminal activity, and perform routine investigations. The ALPR equipment serves a mission-critical function for daily parking and other enforcement assignments.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |
|--------------------------------------|--|
| Approximately \$3,890                | Routine maintenance and periodic repairs |

| Current Life | 3.5 years              |

### Project Description & Justification

This vehicle is a marked squad car used for daily patrol activities. Car #8 is used as a Traffic Enforcement/Accident Investigation unit and serves as the Department's primary Truck Enforcement vehicle. The mileage is 36,777 as of 12/1/2023. It is estimated that the vehicle averages 900 miles per month and serves as a front-line car until other operational needs or mechanical issues dictate its rotation or replacement. Staff recommends to defer the purchase from FY 2025 to FY 2026 of a replacement vehicle due to the pursuit and heavy-duty ratings of the Ford F-150.

### Vehicle Description

The F-150 Police Responder is used for traffic enforcement, truck enforcement, accident investigation, radar/message board trailer deployment, police mountain bike deployment, evidence transport, and WESTAF Major Accident Team deployment. The unit has high water, severe winter conditions, and off-road capabilities to meet all mission-critical assignments. The vehicle has onboard storage for evidence technician equipment, entry tools, protective gear, and specialized hardware.

| Maintenance Costs                             |                   | Average Cost per Repair |
|---|-------------------|-------------------------|
| Routine Maintenance since May 2020            | \$6,389.00        | 13 @ \$491.00           |
| Cost of Repairs While Under Warranty          | \$0.00            |                         |
| <b>Total Spent on Maintenance and Repairs</b> | <b>\$6,389.00</b> |                         |

### Project Alternative

At this time, the Traffic Enforcement car is used to meet the community's number one citizen-driven complaint: speeding and reckless drivers. In addition, the vehicle is used for multiple operational applications. The Department will evaluate this unit's effectiveness and make recommendations to determine actual or deferred replacement. The development of Hybrid and/or All-Electric Vehicles for law enforcement patrol use continues by primary vehicle manufacturers. As their availability expands, the availability of the equipment needed to outfit the vehicles for patrol use will also need to expand. The price of these vehicles is high compared to traditional vehicles, but the price may reduce when the supply increases. The FY 2029 cost assumes the funding requirement anticipated for purchasing an All-Electric Vehicle. The Village will also pursue grant funding for the electrification of its fleet.

### Operational Impact

As a front-line unit, the car is used for all patrol-related activities, plus its specialized applications. This vehicle needs to be properly maintained and replaced as necessary to further the community's expectations of prompt and professional police service.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |
|--------------------------------------|--|
| Approximately \$3,890                | Routine maintenance and periodic repairs |

### Carryover History

FY 2025 to FY 2026

| Useful Life                      | 7 years                                      |   |             |
| Current Life                     | 3 years                                      |   |             |

### Project Description & Justification

The estimated cost of the vehicle incorporates \$18,480 for equipment and installation, which includes exterior police markings, light emitting diode (LED) light bar, and miscellaneous items needed to facilitate the installation of major components. The current mileage is 21,709 miles and the average monthly miles driven is estimated to be 900 miles per month. The estimated mileage at time of replacement is 90,000. Depending on the condition of the vehicle at replacement time, this vehicle could be offered to another department or disposed of at auction.

### Vehicle Description

This vehicle is a marked utility van used for daily Community Service activities. The unit is equipped with a laptop computer and Zebra printer. The Community Service Vehicle is used for daily parking violations, stray animals, evidence transport, traffic control, large equipment transport and deploying the Speed Trailers.

| Maintenance Costs                             |                   | Average Cost<br>per Repair |
|---|-------------------|----------------------------|
| Routine Maintenance since November, 2020      | \$1,407.09        | 4 @ \$352                  |
| Cost of Repairs (Under Warranty)              | \$0.00            |                            |
| <b>Total Spent on Maintenance and Repairs</b> | <b>\$1,407.09</b> |                            |

### Project Alternative

Due to the nature of the use, deferral beyond its estimated seven year useful life is not recommended for a CSO vehicle. The reliability decreases as age increases, and maintenance and repair costs often increase. The development of Hybrid and/or All-Electric Vehicles for law enforcement patrol use continues by major vehicle manufactures. As their availability expands the availability of the equipment needed to outfit the vehicles for patrol use will also need to expand. The price of these vehicles is high in comparison to traditional vehicles at this time, but the price may reduce when the supply increases. The FY 2029 cost assumes the funding requirement anticipated for the purchase of an All-Electric Vehicle. The Village will also pursue grant funding for the electrification of its fleet.

### Operational Impact

Breakdowns have a direct impact on the department's ability to respond to requests from residents, provide traffic control, respond to parking complaints, transport evidence, and perform other routine activities.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |

| Make  | Dodge  |   |             |
| Model   | Durango                                      |   |             |
| Year  | 2017   |   |             |
| Cost  | \$31,341                                     |   |             |
| Useful Life                                     | 5 years                                      |   |             |
| Current Life                                    | 7 years                                      |   |             |

### Project Description & Justification

The vehicle's estimated cost incorporates an all-wheel-drive SUV, \$10,000 for covert equipment and installation, including hidden light-emitting diode (LED) emergency lights, radio antennae, and miscellaneous items needed to facilitate the installation of major components. The in-service date was October 1, 2016. The mileage is 33,351 as of 12/1/2023. The average monthly miles driven is 390. Estimated mileage at the time of replacement: 58,000. Staff recommends deferring the purchase of this vehicle from FY 2025 to FY 2026. Depending on the vehicle's condition at replacement time, this vehicle will be deferred or can be rotated as the secondary Detective Unit, a tactical vehicle, command vehicle, or training vehicle.

### Vehicle Description

This unmarked detective unit is used daily for criminal investigations, tactical patrol, and covert surveillance. It is equipped with hidden emergency lights, a laptop computer, and car radios. The vehicle is set up to store protective gear and additional weapons systems.

| Maintenance Costs                             |                 | Average Cost per Repair |
|---|-----------------|-------------------------|
| Routine Maintenance since October 1, 2016     | \$691.75        | 9 @ \$76.86             |
| Cost of Repairs While Under Warranty          | \$0.00          |                         |
| <b>Total Spent on Maintenance and Repairs</b> | <b>\$691.75</b> |                         |

### Project Alternative

Due to the nature of the use, deferral beyond its estimated life is not recommended for a tactical vehicle. The reliability decreases as age increases, and maintenance and repair costs often increase. In addition, tactical or detective plainclothes units are eventually identified by the local criminal element and become somewhat ineffective for investigative purposes. Major vehicle manufacturers continue the development of Hybrid and/or All-Electric Vehicles for law enforcement patrol use. As their availability expands, the availability of the equipment needed to outfit the vehicles for patrol use will also need to expand. The price of these vehicles is high compared to traditional vehicles, but the price may reduce when the supply increases. The FY 2031 cost assumes the funding requirement anticipated for purchasing an All-Electric Vehicle. The Village will also pursue grant funding for the electrification of its fleet.

### Operational Impact

Breakdowns directly impact the department's ability to respond to and investigate criminal activity. In addition, the Department depends on unmarked/covert units to perform a myriad of surveillance, tactical, investigative and, and arrest functions for the community.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |
|--------------------------------------|--|
| Approximately \$3,890                | Routine maintenance and periodic repairs |

### Carryover History

Deferred from FY 2022, FY 2023, FY 2024, FY 2025 to FY 2026.

| Cost                              | \$38,162                                  |                                   |   |
| Useful Life                       | 6 years                                   |                                   |   |
| Current Life                      | 5.5 years                                 |                                   |   |

### Project Description & Justification

The vehicle's estimated cost incorporates an all-wheel-drive (AWD) vehicle, \$12,992 for covert equipment and installation, including hidden light-emitting diode (LED) emergency lights, radio antenna, and miscellaneous items needed to facilitate the installation of major components. The 2018 Dodge Charger in-service date was January 1, 2018. The mileage is 38,759 as of 12/1/23. The average monthly miles driven is 565. Staff recommends that the vehicle is replaced and reassigned as a plain clothes, alternative vehicle. The vehicle has been used in covert surveillance and undercover operations and needs rotated for officer safety concerns. Estimated mileage at the time of replacement: 50,000.

### Vehicle Description

This is an unmarked police unit used daily for tactical patrol and covert surveillance. The unit is equipped with hidden emergency lights, a laptop computer, a printer, and car radios. The unit is set up to store additional protective gear and weapons systems.

| Maintenance Costs                             |                   | Average Cost per Repair |
|---|-------------------|-------------------------|
| Routine Maintenance since November, 2019      | \$6,272.00        | 22 @ \$285.00           |
| Cost of Repairs While Under Warranty          | \$0.00            |                         |
| <b>Total Spent on Maintenance and Repairs</b> | <b>\$6,272.00</b> |                         |

### Project Alternative

Due to the nature of the use, deferral beyond its estimated life is not recommended for a tactical vehicle. The reliability decreases as age increases, and maintenance and repair costs often increase. Major vehicle manufacturers continue the development of Hybrid and/or All-Electric Vehicles for law enforcement patrol use. As their availability expands, the availability of the equipment needed to outfit the vehicles for patrol use will also need to expand. The price of these vehicles is high compared to traditional vehicles, but the price may reduce when the supply increases. The FY 2031 cost assumes the funding requirement anticipated for purchasing an All-Electric Vehicle. The Village will also pursue grant funding for the electrification of its fleet.

### Operational Impact

Breakdowns directly impact the department's ability to respond to and investigate criminal activity. The effectiveness of an unmarked/undercover vehicle can be diminished over time due to local criminal offenders having identified it as a police car. The car has covert out-of-state plates.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |
|--------------------------------------|--|
| Approximately \$3,890                | Routine maintenance and periodic repairs |

### Carryover History

This vehicle has been deferred to FY 2025.

| <b>Total</b>                             | <b>\$573</b>    |

### Project Alternative

- Purchase an all-wheel drive SUV to place in service for severe weather conditions. This provides better traction ability during response in extreme weather conditions (four wheel vs. two wheel drive).
- Purchase a Hybrid, Electric or Natural Gas vehicle for fuel efficiency. This will require the installation of a refueling/recharging system or identification of a system nearby.

### Operational Impact

This vehicle is used by the Deputy Fire Chief for response on emergency calls and for travel to meetings and conferences. When the vehicle is due for replacement the Village will pursue alternative fuel or electric vehicle options consistent with the Village's sustainability goals.

### Project Impact

 Current Life 9 years

### Vehicle Description

A-215 is a Type III (van style front chassis) and serves as an Advanced Life Support (ALS) transport vehicle. Staffed with two firefighter/paramedics, Ambulance 215 responds to an average of 1,500 EMS calls per year. This vehicle operates to treat and transport accident victims and patients of illness to local hospitals. An innovative lifting system (Stryker Power System) is included in the cost of the new vehicle as an additional resource to minimize firefighter injuries due to bariatric (heavy) patients. Three equipment components of the ambulance, totaling \$68,604, were purchased in FY 2024 because of pricing and manufacturer lead time; the remaining costs are reflected in the FY 2025 amount.

| Vehicle | Year | Date    | Road Mileage |
|---------|------|---------|--------------|
| A-215   | 2014 | 12/2023 | 63,069       |

| 214 (Shared reserve unit)  |  | <b>\$5,418</b>    |

### Repair Description

Ambulance 215 is in its ninth year of service. Ambulance 214 (Reserve) has experienced several mechanical issues that are resolved. This vehicle had its engine replaced in FY 2016.

### Project Alternative

### Operational Impact

This vehicle is in the eighth year of a planned eight-year useful life expectancy. This ambulance will be moved to the reserve position, and the existing reserve engine will be sold. The reserve ambulance is shared with the Village of Forest Park.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |

CERF

Contingent on Funding

Make Ford  
 Model F-250  
 Year 2006  
 Cost \$35,000  
 Useful Life 8 years  
 Current Life 18 years

### Vehicle Description

C218 is the utility vehicle assigned to Haz-Mat & Technical Rescue. The current vehicle is purchased through the State of Illinois Central Management Service (CMS) program or at a local dealer that will match the cost in the State Purchasing program. This vehicle is planned to be replaced with an E-One Light Rescue Vehicle. This vehicle is a four-wheel drive for extreme weather conditions and is equipped with emergency lights and a siren for emergency response. It can tow safety trailers, including the Citizen Corps and MABAS trailers. Additionally, this vehicle serves as the Incident Command vehicle in disaster situations. The current vehicle will be sold or become a pool car after it is replaced.

| Vehicle | Year | Date    | Road Mileage |
|---------|------|---------|--------------|
| C-218   | 2006 | 12/2023 | 19,633       |

### Maintenance Costs for Past 2.5 Years

|  |              |          |
|--|--------------|----------|
| Routine Maintenance as of December, 2023 | \$165        | (1 item) |
| Cost of Repairs                          | \$623        | (1 item) |
| <b>Total</b>                             | <b>\$788</b> |          |

### Project Alternative

- Purchase an all-wheel-drive SUV to place in service for severe weather conditions, which provides better traction ability during fire response in extreme weather conditions (four-wheel vs. two-wheel drive).
- Purchase an electric or hybrid vehicle consistent with the Village's sustainability goals.
- Purchase a light rescue vehicle to replace current vehicle.

### Operational Impact

This vehicle was initially scheduled for an eight-year useful life. When purchased, it will replace the current vehicle used by Haz-Mat & Technical Rescue and tow MABAS-11 assets. The replaced vehicle can be utilized for school, training, travel, and an auxiliary vehicle in the Village fleet for other departments or sold at auction.

### Project Impact

| Annual \$ Impact on Operating Budget                                      | Description of Operating Budget Impact  |

### Vehicle Description

This Emergency One HP 75 Quint is a 2,000-gallon per minute quint (pumper/aerial ladder) with a 75 foot aerial ladder, a 500-gallon water tank and a full complement of fire hose, ground ladders, and equipment. This vehicle meets NFPA 1901 and Insurance Services Office (ISO) criteria for a Quint. A Quint entails the following NFPA 1901 requirements: a rated fire pump, and aerial ladder, a water tank, ground ladders and hose and equipment storage. FD Staff will be submitting a grant proposal to FEMA through the Assistance to Firefighters Grant in hopes to cover some of the costs of this vehicle.

| Vehicle | Year | Date | Road Mileage | Engine Hours | Actual Mileage |
|---------|------|------|--------------|--------------|----------------|
|         |      |      |              |              | 0              |

\*Fire and EMS vehicles use a conversion of 25 miles per engine hour due to the on scene time at an emergency call.

### Project Alternative

- Replace Pumper 222 with another Class A Pumper

### Operational Impact

This concept is for an operational change to help us respond to emergencies in a safer more efficient manner by combining the functions of two of our current apparatus into one vehicle. This will make our operations safer, the use of our manpower more efficient and reduce vehicle maintenance costs. This concept would include the sale or trade in of Truck 219 and Reserve Engine 222. The sale/trade in of these vehicles will help offset the purchase price of the new Quint vehicle.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact   |
|--------------------------------------|--|
| \$4,500 Preventive Maintenance       | Reduce fleet maintenance by providing new, warranty-driven apparatus, replacing older, costlier vehicles, and placing E-213, a 10-year-old vehicle, in reserve status. |

### Project Alternative

The alternative is to defer the purchase to later years; or to explore the potential acquisition of alternative fuel or electric vehicles when they become available in the marketplace.

### Operational Impact

This is one of ten primary snow plowing vehicles in the Village's snow and ice control fleet. A breakdown reduces the Village's snow removal response by a tenth and extends the time needed to complete snow removal operations. This unit is used for other operations (hauling materials) which would also be impacted if it were removed from the fleet.

### Vehicle Description

Various personnel in the Operations Division operate this truck. The vehicle is equipped with a eight-foot stainless steel dump body, 500 gallon salt brine sprayer, ten-foot power angling snowplow, emergency lighting, and two-way radio. This vehicle is used for anti-icing operations and to plow and salt main roads, alleys and parking lots throughout the Village during snow removal operations. It is also used to haul soil and debris during water and sewer repairs.

### Vehicle Description

The street sweeper is the only vehicle in the Village's fleet that sweeps Village streets and State routes. State routes are swept per the Intergovernmental Street Maintenance Agreement held between the Village and the Illinois Department of Transportation (IDOT).

The street sweeper performs a vital function as it removes debris (leaves, twigs, garbage, etc.) from Village streets and prevents such debris from entering the Village's combined sewer system. It also improves the appearance of the Village. Removing debris from Village streets and keeping it out of the Village's sewer system reduces blockages and prevents debris from being discharged into the Des Plaines River during combined sewer overflow events.

### Vehicle Description

The replacement for this vehicle was ordered in FY 2024 and is expected in FY 2025. Various personnel in the Operations Division operate this truck. The vehicle has a 13-foot dump body, stainless steel v-box salt spreader with manual controls, liquid salt pre-wetting system, 11-foot power angling snowplow, dump body tarp, emergency lighting, and two-way radio. It is one of two tandem axle dump trucks capable of hauling heavy loads.

### Vehicle Description

Various personnel in the Operations Division operate this truck. The vehicle has a dump body, v-box salt spreader, 250-gallon salt brine sprayer, nine-foot power angling snowplow, emergency lighting, and two-way radio. This vehicle applies salt brine solution to roadways, plow and salt alleys, and parking lots throughout the Village during snow removal operations and hauling miscellaneous raw materials.

### Recent Maintenance Costs

| Date         | Maintenance Performed  | Cost              |
|--------------|--|-------------------|
| 2/18/2018    | Replaced rear rim  | \$600.00          |
| 9/1/2018     | Replaced plastic hydraulic tank                              | \$250.00          |
| 10/1/2018    | Replaced rear brake pads and rotors                          | \$1,181.42        |
| 2/19/2020    | Replaced rear strobe light                                   | \$67.00           |
| 5/20/2020    | Replaced passenger side mirror                               | \$700.00          |
| 1/20/2020    | Replaced battery   | \$120.00          |
| 3/9/2021     | Replaced side mirror   | \$270.00          |
| 4/7/2021     | Replaced vibrator motor for salt box                         | \$752.92          |
| 7/16/2021    | Brake light  | \$22.10           |
| 12/21/2021   | Oil and filter change  | \$45.97           |
| 1/4/2022     | Air filter changed   | \$18.13           |
| 3/13/2022    | Calipers and brake pads replaced (failure due to salt spray) | \$833.43          |
| 8/1/2022     | Safety lane inspection                                       | \$40.00           |
| 12/28/2022   | Hydraulic hose for plow attachmenet                          | \$116.00          |
| 1/31/2023    | Oil and oil filter change                                    | \$103.97          |
| 3/13/2023    | Replace tie rods, ball joints, and brake pads                | \$1,690.65        |
| 3/16/2023    | Alignment assoicated with tie rod repair                     | \$130.00          |
| 8/23/2023    | Battery repaclement  | \$124.50          |
| 8/31/2023    | Safety lane inspection                                       | \$40.00           |
| <b>Total</b> |  | <b>\$7,106.09</b> |

### Project Alternative

The alternative is to defer the purchase to later years and explore the potential acquisition of alternative fuel or electric vehicles when they become available in the marketplace.

### Operational Impact

This truck is one of ten primary snow plowing vehicles in the Village's snow and ice control fleet and one of two vehicles equipped with anti-icing equipment. A breakdown reduces the Village's snow removal response by a tenth and anti-icing capabilities by half. It also extends the time needed to complete snow removal operations. This unit is used for other operations (hauling materials), which would also be impacted if removed from the fleet.

**Project Impact**

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact          |
|--------------------------------------|---|
| \$1,100.00                           | Routine Annual Maintenance and periodic repairs |

**Carryover History**

This vehicle was carried over from FY 2023 and was scheduled for replacement in FY 2024. A replacement vehicle was ordered in FY 2024 but deferred to FY 2025 due to availability of vehicles.

| 11/13/2023   | Two tires   | \$1,195.68         |
| <b>Total</b> |   | <b>\$28,249.27</b> |

**Project Alternative**

This vehicle was replaced in FY 2012 by truck #41. Instead of purchasing a new full-size six-wheel dump truck, the vehicle was kept and refurbished. The Village will continue to explore the potential acquisition of alternative fuel or electric vehicles when they become available in the marketplace.

**Background**

Recognizing that both of the Village’s Packer trucks (used for leaf removal) were in mechanically poor condition, staff reevaluated the Village’s leaf collection program and determined that hauling leaves utilizing the dump truck fleet is the most operationally efficient means for collecting and transporting leaves. As a result, staff recommended disposing of truck #31 and rehabilitating the larger tandem axle dump truck (old #41) based on the following reasons:

1. Although the cab and chassis in old truck #41 are in good operating condition, the dump body was rusted with significant deterioration. That was the primary reason it was replaced in FY 2012.
2. Old truck #41 is a tandem-axle truck that can transport a larger, heavier load than truck #31, a single axle dump truck.
3. The dump body on old truck #41 is approximately two feet longer and has higher sides than truck #31.
4. It was expected that truck #31 could be sold at public auction as surplus property for approximately \$10,000 to \$15,000. The vehicle actually sold for \$23,350.

Staff recommended that the cab and chassis on dump truck #41 be reconditioned/refurbished and that the dump body and some of the hydraulic controls be replaced. Costs associated with these improvements are as follows (CERF Expenditures):

- \$7,000-Cab and chassis recondition/refurbish
- \$19,153-Replace dump body and update hydraulic controls

Cost Comparison:

- Sale of truck #31: \$23,350
- Cost to recondition current truck \$26,153
- Purchase of a new dump truck: \$175,000

This alternative allowed Public Works to maintain two tandem axle dump trucks in the fleet and extended the life of the old truck #41 by approximately ten years (replacement is scheduled in FY 2023), which is approximately 80% of the life cycle of a new dump truck.

**Operational Impact**

This truck is one of ten primary snow plowing vehicles in the Village’s snow and ice control fleet. A breakdown reduces the Village’s snow removal response by a tenth and extends the time needed to complete snow removal operations. This unit is used for other operations (hauling materials), which would also be impacted if removed from the fleet.

**Project Impact**

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact          |
|--------------------------------------|---|
| \$3,000.00                           | Routine Annual Maintenance and periodic repairs |

**Carryover History**

This vehicle was scheduled for replacement in FY 2022; however, due to the COVID-19 pandemic, a new vehicle could not be sourced. As a result, the purchase of the new vehicle has been deferred to FY 2025.

### Vehicle Description

Various personnel in the Operations Division use this front-end loader. The vehicle is equipped with a 2¼ yard combination bucket, forks, emergency lighting, and two-way radio. It is also equipped with a quick coupling device (quick-hitch) that allows the use of different attachments, (i.e. forks, snow plows, material handling arms, brooms, brush handling buckets, etc.) making the vehicle more useful over a broader range of tasks.

| <b>Total</b> |  | <b>\$19,631.22</b> |

### Project Alternative

The alternative is to delay the purchase and reschedule during later years. Should the front end loader fail during a snow removal and salting operation, the Village would have no ability to load salt into salt trucks.

## Operational Impact

This unit is the only front-end loader in Public Works and is the workhorse of the fleet. It is used for loading trucks with various materials (road salt, sand, stone, leaves, etc.) and is critically important to the operations involving the removal of tree debris, logs, heavy objects, debris from storms, and providing sand for flooded areas. Road salt used during winter season cannot be loaded without the front-end loader. This piece of equipment is also used to pick up and load the majority of leaves for the Village's leaf program.

## Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact          |
|--------------------------------------|---|
| \$2,100.00                           | Routine Annual Maintenance and periodic repairs |

### Vehicle Description

Various personnel in the Operations Division use this aerial truck. The vehicle is equipped with a 55-foot working height utility bucket, emergency lighting, and two-way radio. The vehicle is used for tree trimming, streetlight maintenance, traffic signal maintenance, and installing holiday decorations. The Operations Division has begun outsourcing tree trimming work, reducing the amount of strain on the vehicle.

### Vehicle Description

Various personnel in the Operations Division use this pickup truck to perform tasks throughout the Village. This truck is equipped with emergency lighting, two-way radio, and a nine-foot angling snowplow, used for plowing alleys and parking lots during snow events. The vehicle is also one of three pickup trucks outfitted with a large broom attachment and is used during leaf season to push piles of leaves.

| 1/25/2022    | Plow replaced upper arm lift assembly                         | \$389.60           |
| 2/1/2022     | Air filter replaced   | \$18.13            |
| 10/12/2022   | Safety lane inspection  | \$40.00            |
| 11/18/2022   | Tire repair   | \$208.00           |
| 11/22/2022   | Oil change, brake pads, trans kit and trans harness/wire loom | \$1,988.27         |
| 1/19/2023    | Plow pump, new controller, and misc repairs                   | \$1,401.58         |
| 1/24/2023    | Oil and oil filter change                                     | \$79.97            |
| 1/24/2023    | Air filter change   | \$15.09            |
| 8/3/2023     | Replaced evaporator, heater core, control, module, and freon  | \$3,421.99         |
| 9/28/2023    | Replaced battery  | \$230.00           |
| <b>Total</b> |   | <b>\$12,534.69</b> |

### Project Alternative

The alternative is to defer the purchase to later years. The Village will explore the potential acquisition of alternative fuel or electric vehicles when they become available in the marketplace.

### Operational Impact

This vehicle was initially scheduled for replacement in FY 2020 and has been deferred due to the vehicle's condition. Staff is recommending again deferring this replacement to FY 2023. This truck is one of ten primary snow plowing vehicles in the Village's snow and ice control fleet. It is also one of three vehicles necessary to push piles of leaves during leaf season. These two operations are very demanding on the drivetrain and suspension systems. A breakdown reduces the Village's snow removal response and extends the time needed to complete snow and leaf removal operations. This unit is used for other tasks that would also be impacted if removed from the fleet.

**Project Impact**

| <b>Annual \$ Impact on Operating Budget</b> | <b>Description of Operating Budget Impact</b>   |
|---|---|
| \$1,400.00                                  | Routine Annual Maintenance and periodic repairs |

**Carryover History**

Carried over from FY 2020 and was again schedule for replacment in FY 2024. A replacement vehicle was ordered in FY 2024 but deferred to FY 2025 due to availability of vehicles.

### Vehicle Description

The Village's skid-steer loader is a versatile unit that allows Public Works personnel to load and relocate various materials, plow sidewalks during snow removal and break through pavement for water and sewer repairs. The Village owns the following attachments for this unit: bucket (loading various materials such as sand, stone, and topsoil), broom (sweeping), forks (loading pallets and other large items/water and sewer main repairs), v-plow (plowing snow on sidewalks) and a concrete breaker (water and sewer repairs). The Village also owns a flat-bed trailer that is used to transport the skid-steer loader when it is used on projects that are located a significant distance from the Public Works Garage.

| \$125.00                             | Routine Annual Maintenance and periodic repairs |

### Carryover History

This vehicle is scheduled for replacement in FY 2025 and is being deferred to FY 2029 due to the vehicle's current condition.

# EQUIPMENT

## ***Equipment – Five Year Capital Improvement Program***

---

The Equipment section of the Capital Improvement Program (CIP) identifies which capital equipment items need to be repaired, replaced, or acquired new over the next five years. This section of the CIP identifies all equipment other than vehicles.

As with other sections of the CIP, these improvements are targeted for specific years and are usually financed through the Capital Equipment Replacement Fund (CERF). The following improvements are proposed for FY 2025:

| <b>Equipment</b>                         | <b>Cost of Equipment</b> | <b>Funding Source</b> | <b>This Project is:</b> |
|--|--------------------------|-----------------------|-------------------------|

**Each project in the CIP is categorized by the requesting department as follows:**

**Critical-** The project must be completed in the year recommended due to safety or operational needs or as mandated by law.

These projects are highlighted in yellow.

**Recommended-** The project will significantly improve operations or safety. The project is strongly recommended for funding in the year recommended or the year after.

**Contingent on Funding-** The project would benefit the Village and improve service levels but is only recommended if funds are available.

**Village of River Forest, Illinois**  
**Five Year Capital Improvement Program**  
**Equipment**  
**Fiscal Year 2025 Budget**

**Project Description & Justification**

The Automated License Plate Readers (ALPR) are a third-generation plate reader currently installed in squad cars #6, #10, and three fixed camera locations at Lake/Thatcher, Lake/Harlem, and North/Harlem. The vehicle ALPRs consist of two cameras mounted on top of the car roof, identifying license plates through recognition software. The license plate is compared to a database of wanted vehicles (Hit List) and alerts the user that a particular car is wanted for the commission of a crime. All license plate data is stored on a server and can be plotted on a map and retrieved later as part of an investigation. In addition, investigators and officers can enter plates to identify cars currently on the Boot List or that are wanted locally for investigative purposes. Since FY 2020, the ALPRs are used as part of the Village's automated PassPort Parking Program, which notes vehicles in timed zones and determines Village parking permits in Village-owned lots/zones.

The ALPRs were initially purchased in FY 2017 and FY 2019 and replaced in FY2024. The ALPRs have read 6,455,970 license plates in calendar year 2023 as of October 31, 2023. The ALPRs have recorded 97,233 "hits", or alerts, during the same time period. The hits alert personnel that something is wrong with a particular vehicle (stolen, wanted, suspended, registered sex offenders, etc.). Staff also manually enter cars eligible for the Denver Boot. The ALPR identified two (2) vehicles eligible for the boot in 2023, with over \$1,800 collected in fines/fees. Also, seventeen (17) Administrative Holds were identified using the ALPR, which led to \$8,500 in Administrative Fees to be collected. In addition, traffic stops initiated from an ALPR "hit" resulted in, six (6) criminal arrests, one (1) warrant arrests, twenty-four (24) traffic arrests, eighty-seven (87) citations, and were used to identify and locate two (2) vehicles used in crimes that occurred in neighboring towns.

Staff continues to monitor the performance of this technology to determine if it should be expanded for use on additional squad cars or to fixed-location ALPR cameras in the business, medical, school districts, and/or TIF districts. This technology has been successful with the Village's permit parking and parking enforcement program (PassPort). In addition, the ALPR Systems complement evidence located on the Village's Street Camera System.

| Fixed ALPR   | Equipment   | Installation | Licensing  | Total       |

Live Scan System

FY 2026

\$27,618

CERF

Critical

Recommended

Contingent on Funding

Original Purchase Date

FY 2018

Cost

\$0

Funding History

N/A

**Project Description & Justification**

The Live Scan System is an automated fingerprint system that creates digital images of an arrestee’s fingerprints. Once digitized, the prints are sent to several entities, including the Illinois Bureau of Identification, Chicago Police Department, and FBI, and are stored in their databases. This system is currently in use by, and connected to, all of the Cook County municipalities and streamlines the identification process. The life expectancy of the current system is six to eight years. The Village did not incur any costs for the initial system supplied by Cook County and the State of Illinois in 2004 or for the new system installed in November 2017.

**Project Alternative**

Although the cost of replacement has been funded by Cook County and the State of Illinois in the past, there is no available information providing municipalities with future funding for this mission-critical automated fingerprint system. The Village should continue to fund this equipment in case the financial responsibility of the next system is passed on to the municipality. The Live Scan Equipment is considered mission-critical to daily police operations.

**Project Impact**

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |
|--------------------------------------|--|
| None                                 | Repairs covered by Cook County         |

**Carryover History**

This item continues to be carried over for future fiscal years. Replacement is dependent on Cook County decisions, protocols for upgrading to a new system, and funding options.

## Equipment - Police

Overweight Truck Scales

FY 2026

\$20,096

CERF

Critical

Recommended

Contingent on Funding

**Original Purchase Date** FY 2006  
**Cost** \$16,600  
**Funding History** N/A

### Project Description & Justification

The Police Department currently owns four truck scales. These scales are placed under each of the tires of a suspected overweight vehicle. If determined to be overweight, the fine could be substantial depending on the violation. The Police Department conducts annual overweight truck enforcement missions, and the dayshift patrol has a trained enforcement officer who does periodic enforcement, separate from the planned missions. Overweight trucks are a detriment to Village streets because they decrease the life of the pavement through excessive wear. The scales are certified by the Illinois State Police annually. The useful life expectancy of the scales is ten years.

### Project Alternative

The enforcement officers will have to seek alternate weigh scales without the portable truck scales. This would require the truck enforcement officer to follow the truck to an alternate location outside the Village's jurisdiction, increasing the amount of time on the traffic stop and decreasing officers' availability. The purchase of this equipment may be deferred depending on the condition of the scales at the time of budget planning.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |
|--------------------------------------|--|
| \$1,000/year                         | Annual Re-certification of Equipment   |

### Carryover History

Although the scales have reached their useful life expectancy, replacement of these scales has been carried over from FY 2019. They are currently in full working order. Each year the scales are re-certified by the State of Illinois. They will require replacement only if found deficient by the State or if a newer, more efficient technology becomes available. The equipment will be carried over from FY 2025 to FY 2026.

**Equipment - Police**

|  |         |          |      |

|  | FY 2027 | \$14,850 | CERF |
|  | FY 2028 | \$15,147 | CERF |

Critical

Recommended

Contingent on Funding

|                        |                   |
|------------------------|-------------------|
| Original Purchase Date | FY 2020           |
| Cost                   | \$26,200          |
| Funding History        | FY 2019 - FY 2020 |

**Project Description & Justification**

The Pole Mounted Radar Speed Display Signs are cost-effective solutions for traffic calming in residential neighborhoods, park areas, school zones, business districts, financial districts, and any location where vehicular, pedestrian, and bicyclist traffic is intermingled. These highly visible signs are strategically placed to get drivers' attention and provide an immediate reminder to slow down. These thirteen (13) signs act as a 24-hour a day force multiplier to police patrol units and can be used to address/monitor citizen-driven complaints. The signs assist in the Village's mission to provide professional public safety services and reduce accidents. The Public Works and Police Departments work together to identify locations where vehicles are known to travel at higher rates of speed and where increased risks to the general public need mitigation. The new pole mounted signs have software to conduct traffic counts and calculate average speed traveled, which benefit both the Police and Public Works Departments for engineering and enforcement analysis. In addition, the use of this type of software assists with providing accurate data for grant writing opportunities.

The Pole Mounted Speed Radar Signs come with a dual-display with speed and message display and solar-powered. As of November 30, 2023, the solar-powered versions have been operating effectively. The useful life of this equipment is five years.

**Project Alternative**

The alternatives to purchasing this equipment would be to increase the use of officers to monitor multiple areas for speeding violations and buy additional Speed Radar Trailers. Having speed radar equipment mounted permanently or for extended periods is a more effective and efficient use of Village resources. As the demand for pole mounted radar signs increases, a more comprehensive analysis of their strategic deployment throughout the community is in order.

**Project Impact**

| Funding History        | FY 2010-FY 2021 |

### Project Description & Justification

The use of portable and in-car radios for public safety communication is imperative for rapid and effective response to any call for service. Radio communications allow the appropriate personnel and equipment to respond to an event. It enhances officer and citizen safety and provides immediate mission-critical information to be broadcast to individual officers or regional agencies monitoring the radio channel. Today's radios allow for many options such as analog/digital crossover, voice and data transmissions, Bluetooth, encryption, talk groups, priority channel scans, and GPS location tracking. Newer technology also allows for radio channel capacities that range from 32-300 channel allotment and can communicate with other local, county, state, and federal agencies. It is also possible to communicate across other discipline lines such as fire, public works, and emergency management.

The police radio program includes a mix of Village-owned single-band radios and dual-band radios owned exclusively by the Cook County Department of Homeland Security. Both types of radios are nearing or are past the end of life. In addition, Cook County can request the immediate return of their radio equipment at any time. Newer radio models and recent technology allows for tri-band radios in the handheld format and some dual-band in-car radios. The newer tri-band technology enhances interoperability over the VHF, UHF, and 800 MHz spectrums, improved voice clarity, and longer-lasting batteries. This multi-year project spans from FY 2021 - FY 2028.

Fiscal Year Projects include FY 2021 five (5) VHF-only handheld radios; FY 2022 no purchases; FY 2023 five (5) Tri-band handheld radios; FY 2024 five (5) Tri-band handheld radios; FY 2025 five (5) Tri-band in-car radios; and FY 2026 five (5) Tri-band in-car radios. Additional radio equipment will be purchased in FY 2027 and FY 2028.

### Project Alternative

The FY 2024-2025 WSCDC budget allowed for a group purchase for all WSCDC communities, and will reduce some costs to the Village. Public safety radios are mission-critical equipment used in day-to-day normal and emergency operations. A leasing option may be available for the handheld units but may not be supported for in-car mobile radios.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact       |
|--------------------------------------|--|
| \$2,500                              | Periodic maintenance and battery replacement |

|                        |              |
|------------------------|--------------|
| Original Purchase Date | FY 2010-2020 |
| Cost                   | N/A          |
| Funding History        | FY 2020-2021 |

**Project Description & Justification**

Law enforcement vehicle-mounted and handheld radar units measure the speed of autos, trucks, and motorcycles on public roadways. This proven traffic enforcement and traffic calming technology have been an effective tool for police agencies for several decades. In River Forest, like other communities, the number one citizen-driven complaint is speeding vehicles on both the main and secondary streets within the Village. The industry standard for establishing probable cause and proving traffic violations in court has been the use of radar devices. This technology provides for the accurate measurement of speed.

The Police Department currently deploys seven in-car radar units and three handheld units. The in-car radar units are mounted in the six front-line squad cars and the dedicated traffic enforcement unit. The three handheld radar units are used by officers assigned to plainclothes units or secondary line squad cars. The addition of an eighth in-car radar unit will allow a system to be installed in the School Liaison Officer's marked squad car for use as part of his regular duties of ensuring school zones are safe for both vehicles and pedestrians. The current handheld and in-car radar units are past or near end of life. A recommended lifespan of these systems is five to seven years. The updated radar technologies draw less power which cuts down on vehicle battery and alternator maintenance. In addition, the new systems will improve the overall effectiveness and efficiency of traffic enforcement operations of the department.

The cost of eight in-car radar systems is \$29, 600 (@ \$3,700 per unit). Installation is estimated at \$500 per unit. The cost of three (3) lidar/photo handheld radar units is \$10,343.

| Radar Unit | Cost     | Install | Total     |
|------------|----------|---------|-----------|
| 8          | \$ 3,700 | \$ 500  | \$ 33,600 |

**Project Alternative**

The use of radar for speed enforcement is an industry-standard. The use of pole mounted speed radar enforcement cameras as an alternative is prohibited under Illinois state law for small municipalities. Lidar, another speed enforcement technology, may be cost-prohibitive because the costs are 30% to 50% more than the standard radar systems.

**Project Impact**

| Annual \$ Impact on Operating Budget                   | Description of Operating Budget Impact       |
|--|--|
| Warranty for three years; \$1,500 annual certification | Periodic Maintenance and Battery Replacement |

**Carryover History**

This project was deferred from FY 2021, FY 2022, FY 2023, FY 2024 to FY 2025.

## Equipment - Police

Speed Monitor/Message Board Trailer

FY 2025

\$20,355

CERF

Critical

Recommended

Contingent on Funding

Original Purchase Date

FY 2017

Cost

\$13,556

Funding History

N/A

### Project Description & Justification

The 2 Speed Monitor/Message Trailers monitor speed and alert drivers traveling over the posted speed limit. The Public Works and Police Departments work together to identify locations where vehicles are known to travel at higher rates of speed, and the trailers are placed in those areas. The trailers are also placed in areas based on complaints/requests from residents or police officers. New speed trailers can conduct traffic counts and calculate average speed traveled, which will benefit both the Police and Public Works Departments. The message board adds the ability to alert drivers to detours and reminds drivers to watch their speed. Some models can take photos of violators' vehicles. One of the units is no longer functioning or repairable. The lifespan of this equipment is approximately 9 years.

### Project Alternative

The alternative to purchasing this equipment would be to have an officer monitoring an area for speeding violations. Although this often happens (officers enforcing speed limits) as part of traffic enforcement missions, utilizing a speed trailer is an additional tool to control excessive speed. In addition, the purchase of stand-alone message boards without radar capability would have to be considered to provide the community with visible alerts on the street.

### Project Impact

Village Hall Camera System

FY 2028

\$80,379

CERF

Critical

Recommended

Contingent on Funding

**Original Purchase Date**

FY 2019

**Cost**

\$90,500

**Funding History**

N/A

**Project Description & Justification**

The Village currently has 40 fixed digital cameras located inside and around the exterior of the Village Hall. The camera system is supported by software and hardwired to the server. The cameras can be monitored by supervisors, the dispatch center, and patrol officers on their squad car laptops or desktop computers. They monitor the booking room, interview rooms, and prisoner cells along with the front doors and lobby. These cameras are fixed with the majority mounted inside the building, they have no moving parts, so they have a longer useful life. The estimated life of this equipment is approximately seven to ten years. These cameras assist with providing overall building security for employees, public officials, residents, visitors, and arrestees. The system enhances the liability protection strategies recommended by IRMA, the Village's insurer. The Village's IT consultant and camera vendor estimate that camera replacement costs are \$2,009 per camera.

| Repair/Improvement   | Estimated Cost   | Fiscal Year |
|--|------------------|-------------|
| Replace internal cameras as needed (40 @ \$2,009 per unit) | \$ 80,379        | FY 2028     |
| <b>Total Project Cost</b>                                  | <b>\$ 80,379</b> |             |

**Project Alternative**

As with any technology, the hardware and software become outdated and should be replaced with newer technology. The continuation of this program is highly recommended. These cameras assist with providing overall building security for employees, public officials, residents, and visitors.

**Project Impact**

There is no annual service fee for this program.

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact                            |
|--------------------------------------|---|
| \$7,000.00                           | Once replaced there is no recurring annual costs for maintenance. |

CERF

Critical

Recommended

Contingent on Funding

**Original Purchase Date**

FY 2017

**Cost**

\$50,761

**Funding History**

FY 2024

**Project Description & Justification**

The eight front-line vehicles and the marked traffic unit currently have digital cameras mounted to the dashboard. The cameras/audio system is used during traffic stops and arrests for recording purposes. Evidence obtained during a traffic arrest is utilized during a trial. The traffic stop videos are downloaded on a server and stored for a minimum of 90 days or longer, depending on the type of incident. Any future upgrades to the in-car camera system may require upgrades to the data storage system on the Village’s computer network. The in-car cameras have an expected lifespan of five to seven years. Each camera system currently costs \$11,180 which includes installation costs per unit. The requested amount is based on estimated future cost for the equipment.

**Project Alternative**

Digital in-car cameras are a necessary tool that helps protect the Village and its officers from false accusations, obtain evidence to support criminal convictions, and increase police transparency for the public. Replacement is highly recommended.

**Project Impact**

There is no annual service fee for this program.

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |
|--------------------------------------|--|
| \$3,100                              | Repair/Replacement of equipment        |

CERF

Critical

Recommended

Contingent on Funding

Original Purchase Date

FY 2018

Cost

\$110,517

Funding History

N/A

### Project Description & Justification

The Village currently has 20 Pan-Tilt-Zoom (PTZ) digital cameras located along the business corridor on Lake Street and 40 fixed cameras in and around Village Hall. The camera system is supported by software, servers, and a wireless antenna system. The cameras can be monitored by supervisors, the dispatch center, and patrol officers on their squad car laptops, desktops, or video monitors. The digital images are stored for a minimum of 90 days and are used as evidence in criminal cases. The PTZ cameras have moving parts and are out in the elements; therefore, they are prone to a shorter life expectancy than fixed cameras. The estimated life of the equipment is approximately five to eight years. Future CIP processes may combine Village Hall, Street Cameras, and future camera expansion projects for planning and funding purposes. A strategic planning study by the Village's IT consultant in FY 2020 included a recommendation for future program expansion, equipment costs, infrastructure upgrades, IT costs, and maintenance costs. That information is in the Information Technology section of the CIP.

This program has been very successful as a force multiplier. Officers routinely refer to the cameras to identify suspects involved in criminal activity, and the Detectives use the footage to create still shots of suspects for bulletins. Below are some images of suspects captured on the camera system and later identified as perpetrators of a crime. It also allows for 24-hour situational awareness of weather conditions and pedestrian/traffic flow.

Retail Theft

Retail Theft

Bike Theft

Burglary

Drug Deal

Robbery

Not only are the cameras used for helping to identify criminal suspects, but the cameras have also been used for situational awareness. For example, during the blizzard of 2011, the Public Works department monitored the snow accumulation and effects on traffic along the Lake Street business corridor.

| <b>Repair/Improvement</b>                | <b>Estimated Cost</b> | <b>Fiscal Year</b> |
|--|-----------------------|--------------------|
| Camera System Servers                    | \$74,566              | FY 2027            |
| Street Camera System                     | \$74,566              | FY 2027            |
| Wireless Point to Point Antenna/Backhaul | \$74,567              | FY 2027            |
| <b>Total Project Cost</b>                | <b>\$223,699</b>      |                    |

**Project Alternative**

Due to the nature of this system, there is no salient alternative if the project is not funded in the future. The continuation of this program is highly recommended.

**Project Impact**

There is no annual service fee for this program.

| <b>Annual \$ Impact on Operating Budget</b> | <b>Description of Operating Budget Impact</b> |
|---|---|
| \$7,000.00                                  | Maintenance Contract                          |

**Carryover History**

During the past three fiscal years, the Village replaced most servers, drivers, storage, software, cables, backup batteries, antennas, mounting hardware, and cameras. Some equipment may have a longer lifespan, which may reduce some estimated costs or allow for partial carryover of some equipment. At this time, the project will be carried over from FY 2024 to FY 2027. During FY 2022, the Village's vendor completed the project and presenting an updated plan for FY 2027 and FY 2028 to create two phases and provide an updated equipment and installation plan. It is believed that the overall costs will be reduced, and the project may be extended past FY 2027. The multi-year implementation of the Strategic Village Camera Expansion Plan is expected to run from FY 2022 to FY 2025. The Village's IT and camera vendor anticipate that replacement of both the Strategic Expansion Plan and the Original Camera System will be combined for future planning and funding purposes in the coming fiscal years.

### Street Camera System Strategic Plan Implementation

FY 2025

\$67,871

CIF

Critical

Recommended

Contingent on Funding

Original Purchase Date

N/A

Cost

N/A

Funding History

FY 2024

### Project Description & Justification

The Village has improved and expanded its street camera system over the past few years. This asset serves as a force multiplier for the Police Department and is a constant tool for day-to-day operations. Due to the expanding needs for the wireless network, equipment, and storage, paired with the desire to continue to expand the system, the Village completed a review and planning process in FY 2020 to determine best practices and needs going forward. This plan formulated recommendations for future expansion and maintenance throughout the Village. During FY 2021, the Village completed upgrades to the storage and software system that operates the street cameras and entered into an agreement with a new vendor for maintenance service and future expansion. Phase 1 of the plan included expanding the Village's camera system to the south side of the Village, primarily along Madison Street and Washington Boulevard, in FY 2022. Phase 2 of the plan included installation of additional equipment in the areas between Chicago Avenue and Augusta Boulevard in FY 2023. In FY 2024, Phase 3 expanded the Village's camera system to the north side of Village, primarily along North Avenue and Division Street as they intersect Harlem Avenue, Lathrop Avenue, and Thatcher Avenue. In total, the expansion included five camera sites consisting of nine cameras.

### Recommended for FY 2025

#### Phase 4 - Optimization of Existing Infrastructure - \$67,871

Phase 4 includes the replacement and standardization of existing equipment at five locations in total. The proposed cost includes all hardware, software, licensing, radio equipment, electric work, and consulting labor.

### Project Alternative

An alternative to this phasing plan would be to continue operating in a reactive manner and address issues as they arise. Additionally, the Village could elect to continue to expand on a case-by-case basis or not expand the system. These alternatives are not recommended due to difficulties created and efficiencies lost by completing the project piecemeal.

### Project Impact

**Project Description & Justification**

The program was initiated in December 2014, and the Department currently has eight Tasers in service and currently deploys the Taser X26 model. The Taser is one of the several less-lethal force options that officers carry daily. Officers must attend training and complete ongoing certifications to carry this tool. The Department has several members certified as trainers. This device allows officers to maintain a safe distance when attempting to render a threat incapable of fighting back or attacking another individual. The useful life of this model is five to seven years. In October 2019, Taser introduced model 7, which has an advanced flashlight, laser, accuracy, multiple shot deployment, and electronic reporting capabilities. The Taser 7 model costs \$4,365 per unit (with extended warranty and accessories). In January 2023, the Taser 10 model was introduced with an estimated cost of \$4,850 per unit (with extended warranty and accessories).

**Project Alternative**

There is no project alternative to this less-lethal conductive energy weapon (CEW) that offers options to the use of a lethal firearm or the close-quarter less-lethal OC Spray and standard baton. The Taser is recommended by IRMA, the Village's insurer, due to research data that show reductions in both offender and officer injuries and death.

Body Worn Camera System

FY 2029

\$214,094

CERF

Critical

Recommended

Contingent on Funding

Original Purchase Date

N/A

Cost

N/A

Funding History

FY 2024

### Project Description & Justification

The Illinois SAFE-T Act was enacted in 2021. The law requires that Law Enforcement Agencies in Illinois equip and train sworn law enforcement with Body Worn Camera systems by January 1, 2025. The Department does not currently have an entire Body Worn Camera System, including equipment, hardware, software, and storage. The project received funding from the General Fund to purchase the whole system in FY 2024. The software licensing agreements are valid for three years.

### Project Alternative

There is no project alternative to this equipment as State Law mandates that all Law Enforcement Agencies in Illinois must have Body Worn Cameras assigned to sworn law enforcement officers by January 1, 2025. The Village will pursue all available grant funding, including through its insurance carrier, to offset the cost of this purchase. The Department applied for and received a grant in the amount of \$60,000 in FY 2024 to assist in funding this project.

### Project Impact

| Annual \$ Impact on Operating Budget    | Description of Operating Budget Impact       |

  Contingent on Funding

**Original Purchase Date** N/A  
**Cost** N/A  
**Funding History** N/A

**Project Description & Justification**

This project is new and is meant to augment and enhance the existing ALPR project. The ALPR system functions as the license plate is compared to a database of wanted vehicles (Hit List) and alerts the user that a particular car is wanted for the commission of a crime. All license plate data is stored on a server and can be plotted on a map and retrieved later as part of an investigation. In addition, investigators and officers can enter plates to identify cars currently on the Boot List or that are wanted locally for investigative purposes. Since FY 2017, the ALPRs are used as part of the Village's traffic calming plan.

Staff recommends that the ALPR project be expanded for use to fixed-location ALPR cameras in the business, medical, school districts, and/or TIF districts as recommended in the Street Camera System Strategic Plan from FY 2020. This newer technology has been successful in reducing citizen speeding complaints. In addition, the ALPR Systems complement evidence located on the Village's Street Camera System. Each phase of the project will cost \$50,800 for the installation of four ALPRs, with a total of eight new cameras installed.

| Year | Number of Units | Equipment | Electrical | Installation | Licensing | Total        |
|------|-----------------|-----------|------------|--------------|-----------|--------------|
| 2025 | 4               | \$1,900   | \$7,800.00 | \$2,500.00   | \$500.00  | \$ 50,800.00 |
| 2026 | 4               | \$1,850   | \$8,000.00 | \$2,605.00   | \$500.00  | \$ 51,816.00 |

**Project Alternative**

The ALPR is a beneficial tool and has yielded results. With previous models, the useful life of this equipment is approximately five to seven years. The Department applied for and received a grant in FY 2024 for additional ALPR systems and received an award of \$58,000 for installation of additional ALPR systems in the areas of retail businesses in the Village

Funding History

New Project

**Project Description & Justification**

The Electric Bicycles will allow for a more nimble and efficient response to crimes of in the areas of the Village can be congested with automobile and pedestrian traffic, such as the business districts. The equipment will also be used for patrol and during special events. The equipment will improve response times when going to a call without officers being exhausted upon arrival as is experienced at times by officers on traditional bicycles. The requested amount would fund three (3) Electric Bicycles, emergency lighting and sirens, storage rack and bag, vehicle mounting equipment for transport of the equipment, and delivery.

**Project Alternative**

The Department currently has an aging fleet of traditional bicycles, originally purchased in the late 1990's. The existing bicycles have been well maintained and are operational. The electric bicycles would be used to replace traditional bicycles that are near the end of their useful life. The alternative is to continue to maintain the existing traditional bicycles and replace them with new equipment after they are no longer repairable or functioning. The Department will continue to search for alternative funding sources, such as grants, to lessen the cost of the equipment.

FY 2035

\$31,085

CERF

Critical

Recommended

Contingent on Funding

Original Purchase Date

1998

Cost

\$10,500

Funding History

GF

**Project Description & Justification**

Initially developed for NATO Operations and as one of the most widely adopted respirators globally, the mask's blend of features makes it the ideal solution for those responding to incidents involving weapons of mass destruction, as well as for the full range of police operations. Its low profile is ideally suited to tactical situations where using sighting of weapons or integration with other equipment is required. The lightweight face piece of the mask is designed to provide a high level of wearer comfort combined with very low breathing resistance.

**Project Alternative**

The Department purchased similar equipment over twenty (20) years ago. The equipment is at the end of its useful life. The Department was hopeful that the replacement equipment would have become available at no or low cost through the US Government, State of Illinois, or law enforcement groups such as ILEAS. The Department will continue to search for alternative funding sources, such as grants, to lessen the cost of the equipment.

**Project Impact**

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |
|--------------------------------------|--|
| \$800                                | Replacement Canisters                  |

**Project Description & Justification**

The Stryker Xpedition Stair Chair helps firefighter/paramedics do what they do best-Save Lives. This device allows caregivers to safely and ergonomically move patients up and down stairs, utilizing a powered track to help decrease the risk of firefighter injury and fatigue. The reduced patient tip back while on the stairs, in combination with the patient containment system will help improve patient psychological and physical safety.

**Project Alternative**

The alternative to this purchase is to continue using the manual stair chair on the front line ambulance.

The Fire Department is pursuing a grant from IRMA to help supplement some of the cost of the purchase.

**Project Impact**

Hydraulic Extrication Equipment

FY 2026

\$80,000

CERF

Critical

Recommended

Contingent on Funding

Original Purchase Date

FY 2013

Cost

\$32,640

Funding History

N/A

### Project Description & Justification

This project aims to upgrade and replace the hydraulic extrication tools on the frontline engine and Quint. Firefighting crews operate this equipment during vehicular accidents and technical rescue responses. The current tools have been in use for nine years with a planned useful life of ten years. New technology allows for lighter weight tools and more powerful lifting, spreading, and cutting pressures. New power units may be all-electric (battery-powered) in the future, taking up less space on the apparatus. The Genesis extrication equipment has state-of-the-art tools, which are lighter, faster, and easier for personnel to operate, thereby reducing the potential for back injuries and strains.

### Project Alternative

Evaluate new technology as the useful life limit approaches.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact                       |
|--------------------------------------|--|
| \$550 after one year                 | Annual maintenance after first year warranty period expires. |

### Carryover History

This was scheduled for replacement in FY 2025 and is being deferred to FY 2026 to assess pricing for new technology.

**Equipment - Fire**

|  |         |          |      |

|  | FY 2029 | \$34,082 | CERF |

Critical
  Recommended
  Contingent on Funding

**Original Purchase Date** FY 2016  
**Cost** \$110,200  
**Repairs (through 11/30)** \$0

**Project Description & Justification**

This project aims to upgrade and replace 4 self-contained breathing apparatus (SCBAs) each fiscal year over the next 5 years. This equipment is a critical part of the firefighter’s personal protective equipment (PPE). The NFPA standard for SCBAs update is every five years. Upgrades enhance the safety of firefighters when operating in an IDLH (immediately dangerous to life and health) atmosphere. Future replacements will be purchased on a yearly schedule to avoid large expenditures in one fiscal year.

**Project Alternative**

The Village applies for grants through the Assistance to Firefighters Grant Program (AFG) for 18 SCBA’s, which is the maximum number of units we can apply for under grant guidelines. The grant covers 95% of the cost of the equipment and the Village must contribute the remaining 5%. The Village would have to utilize the CERF to fund the cost of the remaining two SCBAs.

Purchasing new SCBAs will require the Village to contribute a one-time expense for seven SCBA face pieces and to equip all personnel and spare units on each vehicle. All compressed air bottles require hydrostatic testing every five years and the purchase of new equipment will provide a savings to cover those costs.

The alternative to this purchase is to continue maintaining outdated, non-compliant (NFPA Standard) air packs that provide sufficient protection when operating properly.

**Project Impact**

| Annual \$ Impact on Operating Budget  | Description of Operating Budget Impact                        |
|---|---|
| \$2,000 in maintenance costs for annual testing and \$1,000 in parts replacement. | Continue annual maintenance & flow testing after second year. |

| 1/8/2019     | oil change and oil filter, fuel filter and hydraulic filter replaced | \$15.14           |
| 12/13/2019   | Oil change, fuel filter and hydraulic filter changed                 | \$22.38           |
| 12/17/2020   | Oil change and oil , fuel and hydraulic filters                      | \$22.36           |
| 7/6/2021     | Replace cutting wheel bearings, 4 pockets and 7 teeth.               | \$950.00          |
| 1/4/2022     | Oil change and oil filter. Hydraulic and fuel filter change          | \$30.22           |
| 1/4/2022     | Oil , oil filter, fuel filter, and hydraulic filter change           | \$73.86           |
| <b>Total</b> |  | <b>\$3,154.41</b> |

### Project Alternative

Alternatives to replacing the stump grinder are as follows:

1. Defer replacing the system until it breaks down completely.
2. Purchase a used stump grinder.
3. Lease a stump grinder.
4. Outsource all stump grinding services.
5. Incorporate stump grinding into the tree removal contract and maintain the current unit to grind stumps from in-house tree removals. This would reduce the workload on this piece of equipment by half or more and extend the life of the stumper.

Staff will analyze other alternatives and evaluate closer to the scheduled replacement of this equipment.

### Operational Impact

Although there are alternatives for performing and/or providing for the removal of parkway tree stumps, not performing or providing this service would create trip hazard liabilities to the Village by eliminating the Village’s capacity to remove tree stumps.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact          |
|--------------------------------------|---|
| \$350.00                             | Routine Annual Maintenance and periodic repairs |

### Carryover History

The unit was originally scheduled for replacement in FY 2015, but since there have not been any significant maintenance issues, Staff recommends deferring its replacement to FY 2026.

**Equipment - Public Works**

**Stainless Steel V-Box Salt Spreader (Large)      FY 2026      \$23,000      CERF**

Critical       Recommended       Contingent on Funding

Make                      Swenson  
 Model

## Equipment - Public Works

Sewer Televising System

FY 2026

\$120,000

CERF/WS

Critical

Recommended

Contingent on Funding

Make EnviroSight  
 Model Rover "X"  
 Year 2016  
 Purchase Cost \$71,200  
 Purchased FY 2016  
 Useful Life 10 years  
 Current Life 8 years

### Project Description & Justification

This equipment is used by Public Works personnel to televise and visually inspect the interior of the Village's sewer mains to identify cracks, breaks, and failing sections. This maintenance program is performed during routine and emergency televising situations. The process of sewer televising involves first cleaning the sewer pipe (sewer jetting) and then lowering a motorized camera into a manhole. Using the controls handset, the motorized and lighted camera system then travels through the cleaned pipe, documenting the condition of the interior of the sewer pipe and, where visible, private lateral connections. This equipment is also used in emergencies where a sewer problem can be quickly televised, analyzed, and documented.

### Recent Maintenance Costs

| Date         | Maintenance Performed                         | Cost              |
|--------------|---|-------------------|
| 9/13/2018    | Repair camera cable                           | \$450.00          |

| 7/1/2020     | Repair camera cable                           | \$600.00          |
| 9/1/2020     | Repair camera reel                            | \$844.69          |
| 9/29/2022    | Replaced joystick and cord for hand held unit | \$1,427.55        |
| <b>Total</b> |   | <b>\$4,865.01</b> |

### Project Alternative

During the mid-1990s, the Village outsourced production televising of nearly all sewer mains in the Village. Those videos (VHS tape recordings that were later converted to CD) were used to identify and prioritize sewer point repairs (remove/replace sewer sections in poor condition) and candidates for sewer relining.

In 2011, after addressing nearly all of the sewer problems via point repairs and relining, Public Works initiated an in-house sewer televising program to identify issues with the Village's sewer system that have developed since the 1990s. 2012 was the first year Public Works tracked how many lineal feet of sewer has been televised in-house.

The Village's combined sewer system is critically important infrastructure. Visually inspecting the sewer system (during emergency and non-emergency situations) on a routine schedule is critical to maintaining the pipes in good condition to convey storm and sanitary flow effectively.

Alternatives to replacing the sewer televising equipment are as follows:

1. Defer replacing the system until it breaks down completely.
2. Purchase a new televising system.
3. Lease a televising system.
4. Outsource all sewer televising services.

**Operational Impact**

Although there are alternatives for performing/providing this infrastructure maintenance program, not performing or providing this service would compromise the Village’s efforts to proactively eliminate cracks, breaks, and failing sections of Village sewers that could result in sewer backups into homes and businesses.

**Project Impact**

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact          |
|--------------------------------------|---|
| \$1,200.00                           | Routine Annual Maintenance and periodic repairs |

### Project Description & Justification

This equipment produces a salt brine solution that is applied to roadways in advance of a winter weather event. The solution provides melting at the onset of an event and helps prevent snow and ice from bonding with the pavement. This proactive technique has become popular in recent years and improves winter road conditions while reducing overall material and operating costs.

### Recent Maintenance Costs

| Date         | Maintenance Performed              | Cost            |

### Project Description & Justification

The Village purchased and installed a Level 2 electric vehicle charging station behind Village Hall on Central Avenue in FY 2022. In FY 2023, the Village completed a study to identify viable locations for future stations throughout the Village. \$50,000 is budgeted for the installation of new chargers and ev charging infrastructure in future years. In FY 2026, work will be completed to make additional parking spaces EV Capable at Village-owned parking lots undergoing reconstructiong

### Recent Maintenance Costs

# INFORMATION TECHNOLOGY

## **Information Technology – Five Year Capital Improvement Program**

The Village’s Information Technology (IT) function includes purchasing and maintaining all computer systems and personal computers, providing technical support to all systems, and supervising Village consultants and vendors. The Village outsources its day-to-day and project-specific IT support services to its current vendor, ClientFirst. In FY 2019, ClientFirst updated the Village's IT Strategic Plan with recommendations from that plan incorporated into the CIP. This plan evaluated the Village’s hardware and software capabilities to determine any recommended improvements that could be made to meet the Village’s business needs fully.

The following improvements are proposed for FY 2025:

| <b>Equipment</b>      | <b>Cost of Equipment</b> | <b>Funding Source</b> | <b>This Project is:</b> |
|-----------------------|--------------------------|-----------------------|-------------------------|
| Network Improvements  | \$ 86,900                | CIF                   | Recommended             |
| Software Upgrades     | \$ 55,000                | CIF                   | Recommended             |
| Computer Replacements | \$ 100,000               | CIF                   | Contingent              |
| <b>Total</b>          | <b>\$ 241,900</b>        |                       |                         |

**Each project in the CIP is categorized by the requesting department as follows:**

**Critical-** The project must be completed in the year recommended due to safety or operational needs or as mandated by law.

These projects are highlighted in yellow.

**Recommended-** The project will significantly improve operations or safety. The project is strongly recommended for funding in the year recommended or the year after.

**Contingent on Funding-** The project would benefit the Village and improve service levels but is only recommended if funds are available.

### Spending History

|         |    |         |
|---------|----|---------|
| FY 2024 | \$ | -       |
| FY 2023 | \$ | 115,000 |
| FY 2022 | \$ | -       |
| FY 2021 | \$ | 37,000  |
| FY 2020 | \$ | 12,500  |

### Project Description & Justification

#### Recommended for FY 2025

##### Network Switch Replacement - \$43,900

A switch is a piece of hardware that connects other devices, including servers and computers, by using packet switching to receive and forward data to the destination device. The Village has three sets of switches, two edge switches, and one core switch. Best practice is to replace these switches on a seven-year cycle. The two edge switches were scheduled for replacement in FY 2023 but deferred. Due to the lead time for this item, the installation would be for FY 2024. This cost includes the replacement of all switches and required patch cables and labor to install and properly configure.

##### Wireless Access Points - \$20,000

A wireless access point is the networking device that allows wireless-capable devices to connect to a wired network. These access points allow users to pick up their wireless devices (laptops, for example) and move throughout the building to various meetings and connect to the network without having to connect to a cable in each space. The Village purchased and installed 12 wireless access points in the fall of 2017, and best practice is to replace them every 7 years, which would have been FY2024. This project was delayed due to other priorities however the impact of the delay is evident in the lack of connectivity that is experienced by users.

##### Camera Switch Replacement - \$23,000

A switch is a piece of hardware that connects other devices, in this case, servers and computers, to receive and forward data to the destination device. Some of the switches dedicated to the Village's camera system will require replacement in FY2025. In FY2023 and FY2024, the number of cameras increased significantly which demands more data transferred between the camera in the field and the computer that manages the video. To accommodate that and future growth, larger cable is necessary to ensure the quality and continuity of the transfer. The next time these switches would require replacement would be between 6 and 8 years of service.

#### Recommended for FY 2026 - FY2029

Avigilon Server Upgrades - \$23,000 (FY2026)

Avigilon is the brand of technology used to operate the Police Department's camera system. Due to the progress of the expansion of the street camera system, ensuring that the hardware necessary for displaying and storing the footage is vital to the success of the street camera program. In FY2026, the original two servers will be due for replacement. Delays in replacing servers with such high levels of data traffic can impact the quality of the data (video footage, audio files, for example) and the ability to search and retrieve the files when called upon.

Data Storage Upgrades - \$50,000 (FY2026 and FY2028)

In anticipation of the State mandated body camera implementation, the IT Department is working to keep up with the necessary changes in technology needs such as the storage of the video footage. This plan is built upon the expectation that storage requirements will be demanded in short order once the body camera system is selected and installed. In addition, \$50,000 is also planned for FY2028 in the event that the storage needs are found to be insufficient.

**Project Alternative**

Alternatives to all projects include continuing with the status quo or deferring the projects to a later date; however, it is not recommended. Projects deferred from FY 2024 to FY 2025 are now critical to avoid network outages and the potential for expensive repairs with the current server system. The Village continues to move toward managing its computer network based on best practices, and these recommendations are consistent with that approach.

**Project Impact**

| <b>Annual \$ Impact on Operating Budget</b> | <b>Description of Operating Budget Impact</b>   |
|---|---|
| \$10,000                                    | The impact of IT emergencies can be difficult to forecast, depending on what fails. There can also be labor involved to repair the emergency. |

## Information Technology

|                   |         |          |     |
|-------------------|---------|----------|-----|

|         |    |         |
|---------|----|---------|
| FY 2024 | \$ | -       |
| FY 2022 | \$ | 101,000 |
| FY 2021 | \$ | -       |
| FY 2020 | \$ | 423,100 |
| FY 2019 | \$ | 230,600 |

### Project Description & Justification

#### Recommended for FY 2025

##### ERP System Sustainability Planning Contribution - \$25,000

The Village utilizes Springbrook to manage the day to day operations of the Finance department. Since initially purchased around 2007, there have been many updates pushed out over the years as the software was modified. In preparation for future changes that would develop from these conversations with Springbrook and other similar software programs, the contribution of \$75,000 anticipates the expenses to be incurred as the Village's current and projected needs are considered during the selection process.

##### Server OS Upgrades - \$30,000

Windows Server 2012 (9 server OS's to update) reached the end of life (including technical support from Microsoft) in October 2023. VMWare (2 hosts) should also be updated to the latest version to ensure that the servers are strongest against cyber attacks while still running the day to day operations of the Village.

#### Five-Year Software Capital Project Cost Summary

|   |  |          |
|---|--|----------|
| ERP System Sustainability Planning Contribution |  |          |
| Hardware/Software/Licensing                     |  | \$9,500  |
| Consulting                                      |  | \$15,500 |
| Server OS Upgrades                              |  |          |
| Hardware/Software/Licensing                     |  | \$20,000 |
| Consulting                                      |  | \$10,000 |
| Total   |  | \$55,000 |

#### Project Alternative

ERP contributions could be deferred or lowered but could increase the cost if left to be a one-time payment.

#### **Recommended for FY 2025**

##### Public Safety In-Vehicle Mobile Dispatch Terminals - \$75,000

As technology evolves and becomes more integrated into our personal lives, its vital that our first responders also have as much information as possible at their fingertips as they rush to the aid of residents and visitors of the Village. Mobile Dispatch Terminals (MDTs) mounted inside the response vehicles provide that "at the ready" availability for our Police and Fire departments. The "durable" device for these vehicles are strong enough to withstand the extreme heat and cold weather conditions as well as the strain on the battery for running in vehicles all day. This program replaces half of the 19 laptops for Police and 2 tablets and 1 laptop for Fire in each fiscal year, to maximize the Village's resources while also purchasing devices that are near-identical in make and model.

##### PC Replacement Program - \$25,000

This program aims to upgrade the central processing units (CPUs) of the Village desktop and laptop computer inventory across all departments but excluding the MDTs. The estimated service life of a computer is four to six years; however, the costs of maintaining a machine can increase after its warranty has expired. Replacements are prioritized based upon employee job responsibilities, and some workstations may be assigned older but serviceable PCs. In contrast, other workstations may receive a new computer more frequently. This is a program that should be funded each year so that a handful of computers are replaced each fiscal year in rotation, ensuring that there is a significant financial or negative service impact due to computers being out of commission.

**Five-Year Computer Replacement Capital Project Cost Summary**

|                                  |           |
|----------------------------------|-----------|
| PC Replacement                   |           |
| Hardware/Software/Licensing      | \$20,000  |
| Consulting                       | \$5,000   |
| Public Safety In-Vehicle Laptops |           |
| Hardware/Software/Licensing      | \$75,000  |
| Consulting                       | \$25,000  |
| Total                            | \$125,000 |

**Project Alternative**

If this project is not funded, computers will continue to be replaced in smaller quantities over a longer time period, potentially reducing the productivity of the units and the ability to support newer versions of software.

**Project Impact**

| <b>Annual \$ Impact on Operating Budget</b> | <b>Description of Operating Budget Impact</b>                           |
|---|---|
| \$3,000                                     | Minor maintenance costs to update software, monitors, and minor repairs |

# STREETS, SIDEWALKS AND ALLEYS

**Streets Improvements – Five Year Capital Improvement Program**

The Village of River Forest recognizes the importance of consistently maintaining its streets, sidewalks, and alleys to ensure the safety of drivers and pedestrians.

**Street System Overview**

The Village has 31.6 miles of centerline streets. The recommended funding level for the next five years will maintain the average street rating in good or excellent condition. The Village conducts an annual pavement inventory study and has implemented a crack sealing program to prevent degradation of the streets. The Village rates streets as follows:

| Streets           |           |                          |
|-------------------|-----------|--------------------------|
| Surface Condition | Ranking   | Estimated Remaining Life |
| Excellent         | 7.6 – 9.0 | 15 to 20 years           |
| Good              | 6.1 – 7.5 | 10 to 15 years           |
| Fair              | 4.6 – 6.0 | 6 to 10 years            |
| Poor              | 1.0 – 4.5 | 2 to 5 years             |

**Sidewalk & Curb System Overview**

The Village of River Forest recognizes the need to have a network of safe pedestrian accesses throughout the community. The primary emphasis of the sidewalk program is to ensure the safety of the Village’s sidewalks. To that end, the Village funds 100% of the replacement cost of sidewalks in immediate need of replacement.

The following improvements are proposed for FY 2025:

| Improvement                      | Cost                | Funding Source                                       | Nature of Project |
|----------------------------------|---------------------|--|-------------------|
| Street Patching                  | \$ 100,000          | MFT - \$90,000<br>WS - \$10,000                      | Critical          |
| Sidewalk, Curb & Gutter          | \$ 250,000          | GF - \$205,000<br>WS - \$10,000<br>IIBF - \$35,000   | Critical          |
| Alley Improvement Program        | \$ 55,000           | WS   | Recommended       |
| Street Improvement Program (SIP) | \$ 675,000          | MFT - \$360,000<br>WS - \$50,000<br>IIBF - \$265,000 | Critical          |

**Each project in the CIP is categorized by the requesting department as follows:**

**Critical-** The project must be completed in the year recommended due to safety or operational needs or as mandated by law.

Critical projects are highlighted in yellow.

**Recommended-** The project will significantly improve operations or safety. The project is strongly recommended for funding in the year recommended or the year after.

**Contingent on Funding-** The project would benefit the Village and improve service levels but is only recommended if funds are available.

| FY 2020 | \$ 72,600 | \$ 10,000 | \$ 82,600 |

### Program Description & Justification

This program aims to maintain and improve surface conditions of Village streets, alleys, and parking lots by patching defective areas. This program is intended for pavements of all condition ratings to prolong their useful lives. An annual funding level of \$90,000 to \$100,000 over the next five years is recommended to accomplish this goal. These funding levels are estimates and reflect inflationary increases for construction.

Village Staff annually inspects all streets and areas of pavement failure are placed on a patching list, which is provided to the Village's contractor. Village Staff also includes alleys and parking lots in their inspections and identifies patching needs on all pavements throughout the Village. Asphalt pavement patching utilizes hot mix asphalt (HMA), the standard material approved by the Illinois Department of Transportation for surface repairs. Two inches (thickness) of the failing surface pavement is milled and replaced with new HMA unless deeper patches are required. This patching process is more permanent and resilient than an asphalt "cold" patch. The ideal timing for this maintenance project is when streets are evaluated with a good condition rating but showing signs of early deterioration (cracking, potholes, etc.).

Included in this street patching program are Water and Sewer funds (\$10,000 annually) to install HMA patches on street openings created to repair the Village's water and sewer systems.

### FY 2025 Recommended Project

In FY 2025, a total of \$100,000 is recommended for this maintenance project. Locations are identified for patching on a continual basis.

### Program Alternative

The primary alternative is to resurface the street. Resurfacing, which is a more costly process, involves not only the replacement of defective surfaces but also additional surface areas that have not begun to deteriorate.

### Project Impact

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |

| FY 2020 | \$ 55,089 | \$ 10,000 | \$ 65,089 |

### Program Description & Justification

This program aims to improve the overall condition of public sidewalks and curb/gutters throughout the Village. The objective is to eliminate all trip hazards for pedestrians and bring all sidewalk ramps into compliance with the Americans with Disabilities Act (ADA) requirements. An annual funding levels had previously been at \$65,000 annually. It is recommended that this amount be increased to accomplish the stated objectives. The Village intends to increase the total amount to \$115,000 for FY 2025, by utilizing general funds previously reserved for pavement preservation. Additionally, the Village will utilize a \$100,000 grant received from Cook County to make further upgrades specific to sidewalk crosswalks to ensure ADA compliance. Failure to implement a sidewalk improvement program to repair deteriorated/damaged sidewalks can expose the Village to liability resulting from trips and falls. Based on recent assessment of Village sidewalks, \$250,000 annually is ideal to complete an 8 year replacement

For this program, the Village is divided into three geographical areas. Village Staff inspects one area each year. Over a three-year period, all public sidewalks are inspected. Additionally, Staff has begun analyzing sidewalk ramp criteria at as many locations as time allows, optimizing the replacement of sidewalk ramps over time to ensure compliance with ADA requirements. Trip hazards are rated according to the displacement of adjoining sidewalk squares.

Furthermore, Staff intends to investigate the possibility of including mud-jacking to remove trip hazards. This is a more cost-effective means of removing trip hazards as compared to full replacement, which is the current practice. The following table identifies the sidewalk condition ratings, description of condition, and the recommended action:

| Sidewalk | Joint Displacement                | Recommended Action    |
|----------|-----------------------------------|-----------------------|
| A        | > 1/2" but < or = 1"              | Consider Replacement  |
| B        | >1" but < 1 1/2"                  | Recommend Replacement |
| C        | >1 1/2" with loose/missing pieces | Replace immediately   |

The Village offers participation in the 50/50 sidewalk replacement cost-share program during annual inspections upon request for sidewalks with a "B" rating. A copy of the inspection form is delivered to property owners describing the sidewalk's condition and requesting their participation. The Village replaces all sidewalks with a condition "C" rating. The Village also installs detectable warning pads located at street crossings and intersections designed for the visually impaired. The following is a summary of proposed expenditures for FY 2025:

General

Fund

|   |           |                     |
|---|-----------|---------------------|
| Sidewalk – Condition C (100% Village):  | \$90,000  |                     |
| Sidewalk – Condition A or B (50/50):    | \$10,000  | (revenue - \$5,000) |
| Driveway Aprons (100% Resident):        | \$5,000   | (revenue - \$5,000) |
| Detectable Warning Pads (100% Village): | \$100,000 |                     |

Water and Sewer Fund

|                             |          |
|-----------------------------|----------|
| Curb/gutter (100% Village): | \$10,000 |
|-----------------------------|----------|

**Sidewalk and Curb Annual Inspection Areas:**

| <u>Area No.</u> | <u>Area Limits</u>  | <u>Inspection Years</u> |
|-----------------|---|-------------------------|
| 1               | Des Plaines River to Harlem Avenue/Hawthorne Avenue to                | 2024, 2027, 2030        |
| 2               | Thatcher Avenue to Harlem Avenue/Chicago Avenue to                    | 2025, 2028, 2031        |
| 3               | Thatcher Avenue to Harlem Avenue/Greenfield Street to<br>North Avenue | 2023, 2026, 2029        |

In addition to the annual inspection of the aforementioned designated areas, Village Staff inspects all sidewalks close to schools, parks, and commercial/retail areas every year.

The Village also allows property owners to replace their driveway aprons and private courtesy walks within the public right of way through this program at 100% cost to the property owner (full payment due to the Village before the commencement of work). The primary benefit to the property owner is that they receive competitively bid pricing for their improvement.

**Program Alternative**

Although the preferred option is sidewalk replacement, alternatives to this program involve the installation of an asphalt cold patch in the displaced joints and/or grinding off the edge of the raised sidewalk. Not only is the patching option aesthetically unattractive, but the asphalt can also break loose and re-expose the displaced sidewalk, which re-establishes liability to the Village and increases maintenance costs.

Another option is mud-jacking, which is a process of filling cavities or voids beneath settling concrete. The Village does not currently own equipment to perform this mud-jacking operation.

|         |             |  |
|---------|-------------|--|
| FY 2024 | \$715,616   | (Completion of green Alley project; Paver Maintenance) |
| FY 2023 | \$2,401,334 | (Green Alley project)                                  |
| FY 2022 | \$956,848   | (4 Alleys @ Linden/Franklin)                           |
| FY 2021 | \$245,209   | (Thatcher Ave Alley)                                   |
| FY 2020 | \$917,471   | (Green Alley [3] and Thomas St. Alley Improvements)    |

**Project Description & Justification**

With the reconstruction of all alleys recently completed, work throughout these locations will now shift to ongoing maintenance. This work is extremely important to ensure that the intended function of the alleys (to capture stormwater runoff) can continue to operate at an efficient level. A minimum funding level of \$55,000 for FY 25 and \$60,000 for future years is recommended to accomplish this objective. This funding level should allow for maintenance as-needed at each location.

The Village has a total of 35 alleys, nearly all of which have recently been reconstructed using some form of permeable pavement.

**FY 2025 Recommended Projects**

In FY 2025, a total of \$55,000 is recommended for this maintenance project. This is based on an anticipated "heavy" cleaning cycle once every three years, with "light" cleaning to be performed three times each year that heavy cleaning is not performed. Light cleaning will consist of a restorative street sweeper removing all debris on top of the pavers. It is unlikely that this will remove any material other than what is resting at-grade. The heavy cleaning will include removal of joint aggregate via pressurized water. The dislocated material will be removed and new joint aggregate will be added.

**Program Alternative**

The alternative to this approach is to have Public Works Operations sweep the alleys as needed. However, the type of sweeper that the Village owns is not ideal for this application. Additionally, regular sweeping, while beneficial, will not be able to remove all contaminants. This approach would ultimately lead to the permeable pavers losing their permeability, at which time alley flooding would occur during rain events.

|         |    |        |                              |
|---------|----|--------|------------------------------|
| FY 2024 | \$ | 76,594 | Public Works                 |
| FY 2023 | \$ | -      |                              |
| FY 2022 | \$ | -      |                              |
| FY 2021 | \$ | -      |                              |
| FY 2020 | \$ | 56,500 | (East Thatcher Commuter Lot) |

**Program Description & Justification**

This program aims to improve the condition of the parking/driving surfaces of Village-owned parking lots. The Village owns and/or maintains six parking lots:

- A. Village Hall – 400 Park Avenue – **Resurfacing Scheduled for FY 2025 deferred to FY 2026** (\$70,000; \$85,000 if making additional spaces EV capable)
- B. Public Works Garage – 45 Forest Avenue - Reconstruction completed in FY 2024
- C. Southeast corner of Lake Street and Park Avenue
- D. West Commuter Lot – 400 block of Thatcher Avenue
- E. East Commuter Lot – 400 block of Thatcher Avenue
- F. Lot at 7915-7919 North Avenue – adjacent to CVS parking lot - **Reconstruction Scheduled for FY 2026** (\$30,000; \$45,000 if making additional spaces EV capable)

Several options are available for improving parking lots, including complete reconstruction, resurfacing, asphalt patching, seal-coating, and crack sealing. Additional costs to make spaces EV Capable would be utilizing EV Station

**FY 2025 Recommended Projects**

The parking lot at the Village Hall (400 Park Ave) was originally scheduled for resurfacing in FY 2025. Due to condition of the parking lot and need for crane access to replace building RTU, this project can be deferred until FY 2026.

**Program Alternative**

Not performing any surface maintenance, particularly for lots with deteriorating conditions, will result in total pavement failure and require reconstruction (of base and surface), which is significantly higher in cost than resurfacing. Extensive pavement patching, crack sealing, and seal-coating are cost-effective options. They may slow down the progression of potholes, but the pavement patching needs will be ongoing and could allow for the continued deterioration of the pavement’s base. This deterioration will significantly increase eventual resurfacing costs.

| FY 2020 | \$ 230,658 | \$ 50,000 | \$ 283,902 | \$ 564,561 |

### Program Description & Justification

This program aims to improve the condition of local streets. Its objective is to improve all streets with condition ratings of "Fair" or "Poor" to condition ratings of "Good" to "Excellent." This program does not include capital improvements on state routes.

In years past, Village Staff would visually inspect all local streets and rate them according to the pavement condition. In 2018, however, Staff began utilizing a consultant to help analyze Village roadways for the sole purpose of pavement ratings. This consultant uses cell phone images of the road (taken at 10' intervals) to evaluate roadway conditions. The analysis at each point is compiled with others along the same block, and a rating is established. Streets rated "Poor" or "Fair" are prioritized for one of the construction options (rehabilitation, resurfacing, or reconstruction) depending on the condition, location, and estimated traffic volumes. The timing in improving streets is critical. Waiting too long to address street repairs will result in further deterioration, at which time a more costly repair becomes necessary.

| Streets           |                 |                           |
|-------------------|-----------------|---------------------------|
| Surface Condition | Pavement Rating | Estimated Remaining Life* |
| Excellent         | 0-1.5           | 15 to 20 years            |
| Good              | 1.6-2.5         | 10 to 15 years            |
| Fair              | 2.6-3.5         | 6 to 10 years             |
| Poor              | 3.6-4.5         | 2 to 5 years              |

\*Life estimate is based upon time frame needed for resurfacing assuming a regular maintenance program.

**FY 2025 Recommended Projects**

| <u>Street</u>                            | <u>Replacement Cost</u> |
|--|-------------------------|
| 1. Gale Avenue (Washington to Madison)   | \$110,000.00            |
| 2. Park Avenue (Hawthorn to Washington)  | \$110,000.00            |
| 3. Park Avenue (Augusta to Chicago)      | \$80,000.00             |
| 4. Iowa Street (Thatcher to Keystone)    | \$40,000.00             |
| 5. Franklin Avenue (Augusta to Keystone) | \$100,000.00            |
| 6. Ashland Avenue (Division to Augusta)  | \$120,000.00            |
| 7. Clinton Place (Augusta to Chicago)    | \$115,000.00            |

The projected construction cost to resurface these streets and make other associated improvements is \$675,000. Construction engineering will be performed in-house.

While the Capital Improvement Plan proposes funding for street improvements through FY 2029, these locations have not yet been determined. Staff recommends a minimum funding level of \$675,000 each year, with specific locations selected based on annual street rating surveys.

**Program Alternative**

Not performing any roadway maintenance, particularly for streets in “Poor” condition, will result in total pavement failure and require reconstruction (of base and surface), which is significantly higher in cost than resurfacing.

Extensive pavement patching may be somewhat cost-effective initially for streets with a “Fair” condition rating. It may slow down the progression of potholes, but the pavement patching needs will be ongoing. This is likely to promote the continued deterioration of the street’s base, significantly increasing eventual resurfacing costs.

### Spending History

|         | Crack Sealing | Preservation | Total     |
|---------|---------------|--------------|-----------|
| FY 2024 | \$ 43,569     | \$ 45,580    | \$ 89,149 |
| FY 2023 | \$ 50,002     | \$ 40,613    | \$ 90,615 |
| FY 2022 | \$ 49,298     | \$ -         | \$ 49,298 |
| FY 2021 | \$ 43,400     | \$ 50,000    | \$ 93,400 |
| FY 2020 | \$ 29,553     | \$ 51,905    | \$ 81,458 |

### Program Description & Justification

Village Staff believes the practice of Crack Sealing to be invaluable. Ideally, this work is completed when the pavement is still in good condition with minimal cracking. This approach enables a pavement in good condition to remain as such for longer, which ultimately extends the life of the pavement and minimizes the overall cost of the pavement life cycle.

The following figure demonstrates the relationship between pavement condition and typical types of pavement preservation and /or street improvements:

The following figure demonstrates how preventative maintenance can extend pavement performance:

**FY 2025 Recommended Projects**

With the Village continuing to resurface a significant number of streets on an annual basis, Staff recommends maintaining a budget of \$50,000 for crack sealing. This budget will enable Staff to maintain these recently resurfaced pavements in good condition in hopes of preventing them from deteriorating as rapidly as they otherwise would.

Streets that are candidates for crack sealing will be determined in late winter/early spring to maximize each application's efficiency.

**Program Alternative**

The alternative is to defer this project to minimize disruption to residents who are working from home due to the ongoing COVID-19 pandemic. Another alternative is a reactive maintenance program that will accelerate the deterioration of Village streets. These maintenance programs, along with pavement patching, will prolong the useful life of Village streets. By not pursuing these maintenance programs, the following infrastructure improvements will be necessary at more frequent intervals:

- Resurfacing: This is a more costly improvement that requires removing and replacing the existing worn pavement and minimal base improvement. This type of construction is typically completed over several weeks. On the other hand, rejuvenation can be completed in a few hours.
- Reconstruction: This is a significantly more costly improvement that is necessary when surface pavement and extensive base failure occur.

### REBUILD Illinois Project

FY 2025  
FY 2026

\$686,279  
\$0

MFT  
MFT

Critical

Recommended

Contingent on Funding

#### Spending History

FY 2024 \$ 50,000 projected

#### Program Description & Justification

This project is based on newly available funding from the Illinois Department of Transportation (IDOT), known as the REBUILD Illinois capital program. These grants will be made available to the Village over three years (FY 2021-FY 2023) through a series of six disbursements. Each disbursement is in the amount of \$122,713.13.

While these grants are received and designated similar to the Village's annual Motor Fuel Tax (MFT) disbursements, they must be accounted for separately. In addition, the funds must be used for a bondable capital improvement with an average useful life of greater than or equal to 13 years. Funding must be associated with an identified project (or projects) within one year of receipt, but funding does not have to be expended until July 1, 2025.

#### FY 2025 Recommended Projects

This project will be expected to be in the form of a roadway resurfacing project, not unlike the Village's annual Street Improvement Project. All work on this project is projected to be completed in FY 2025. Infrastructure Bond funds can also be used to supplement REBUILD funds for this project. At the completion of this project, all REBUILD funds amounting to \$736,279 will have been expended.

#### FY 2025 Recommended Projects

| <u>Street</u>                            | <u>Replacement Cost</u> |
|--|-------------------------|
| 1. Augusta Street (Keystone to Harlem)   | \$450,000.00            |
| 2. Thatcher Avenue (Hawthorn to Madison) | \$150,000.00            |
| 3. Hawthorne Avenue (Forest to Franklin) | \$75,000.00             |
| 4. William Street (Augusta to Chicago)   | \$75,000.00             |

#### Program Alternative

If these funds are not spent by the IDOT-designated deadline of July 1, 2025, they will be forfeited by the Village. Based on the types of construction allowed by IDOT and the type of work typically conducted in the Village, a roadway resurfacing project appears to be the most feasible project to be completed with these funds.

#### Project Impact

Contingent on Funding

---

### **Spending History**

#### **Program Description & Justification**

This project is based on newly available funding from the Illinois Department of Commerce and Economic Opportunity (DCEO) totaling \$250,000. These grants will be made available to the Village through September 30, 2025.

These funds are specifically earmarked for the Village to complete the Phase 1 Engineering Study on the Harlem Ave. Bridge Viaduct. The Villages of River Forest, Oak Park, and Forest Park joined forces in 2008 to begin preliminary engineering for this project. Due to funding shortages and other hurdles, the project has been stagnant for years.

#### **FY 2025 Recommended Projects**

The project will include all "Design/Engineering" costs associated with the Phase 1 study for the Harlem Avenue Underpass Project: preliminary project design, approval of an IGA between the Villages of River Forest, Oak Park, Forest Park, Illinois Department of Transportation (IDOT), Chicago Transit Authority (CTA), Metra, and the Union Pacific Railroad, review fees, new survey, traffic data, and crash analysis.

#### **Program Alternative**

If these funds are not spent by the DCEO-designated deadline of September 30, 2025, they will be forfeited by the Village.

#### **Project Impact**

 Contingent on Funding

### **Spending History**

|         |          |  |
|---------|----------|--|
| FY 2024 | \$24,621 | Engineering for Harlem and temporary installations for Washington. |
| FY 2023 | \$16,615 | Installation of temporary barriers                                 |

### **Project Description & Justification**

This project aims to replace the temporary traffic control installations in the Northeast corner of the Village with permanent traffic control installations in addition to anticipated maintenance costs. Based on the recommendations from Thomas Engineering, stemming from the results of the Village Wide Traffic Study, additional funds are needed for the installation of temporary/permanent traffic control installations throughout the remainder of the Village. The first project to be undertaken from these recommendations is the installation of speed reduction controls along the Washington Blvd. corridor.

### **FY 2025 Recommended Project**

Currently, two locations in northeast River Forest need temporary installations to be replaced with permanent installations. Both LeMoyné and Greenfield will be converted to “right-in right-out” curb diverters at Harlem Ave. These changes are consistent with the existing traffic patterns resulting from the temporary installations. The anticipated cost for this work is \$100,000.

### **Project Alternative**

The alternative to this project is to maintain or remove the existing temporary barriers, delay installation of permanent barriers and to not implement any new measures from the Village-Wide Traffic Study until future years.

### **Project Impact**

### Spending History

FY 2024    \$3,248    (Phase 1 Engineering)

### Project Description & Justification

The Villages of River Forest and Elmwood Park desire to implement streetscape enhancements to the North Avenue corridor from Thatcher Avenue to Harlem Avenue. North Avenue is a shared border between both Villages, and there is a shared desire to create a more walkable and pedestrian friendly environment. The Village and Elmwood Park entered into an intergovernmental agreement that splits the cost of a Phase 1 Engineering Study for streetscape improvements on the corridor. The Phase 1 Study is being performed by Christopher B. Burke Engineering, Ltd and is estimated cost of the study is \$274,303. A kick off meeting between the two communities was held on April 11, 2023. While Phase 2 design and construction costs are not yet known, it is anticipated that the project stakeholders will be able to utilize state funds to help offset direct costs to the Village. The State of Illinois has also appropriated \$21,400,000 for River Forest, Elmwood Park, Melrose Park, River Grove, and Oak Park for costs associated with the North Avenue streetscape and business development.

### FY 2025 Recommended Project

Phase 1 Engineering is currently underway. Construction is expected to begin in Summer of 2025.

### Project Alternative

This project has already been approved by IDOT and appropriated state funds.

# WATER AND SEWER IMPROVEMENTS

## **Water and Sewer Improvements – Five Year Capital Improvement Program**

This section of the Capital Improvement Plan identifies funding for sewer and water improvements, which are scheduled to continue through FY 2029. The Village’s sewer and water system is comprised of the following:

| Type of Sewer           | Number of Miles |
|-------------------------|-----------------|
| Combined Sanitary Sewer | 33.13           |
| Storm Sewer             | 3.37            |
| Water Main              | 40              |

Improvements planned for FY 2025 include:

| Improvement                                   | Cost             | Funding Source | Nature of Project |
|---|------------------|----------------|-------------------|
| Sewer Lining                                  | 140,000          | WS             | Critical          |
| Sewer Point Repairs                           | 35,000           | WS             | Critical          |
| Stormwater Master Plan                        | 50,000           | WS             | Recommended       |
| Underground Reservoir Improvements            | 25,000           | WS             | Critical          |
| Water Meter Replacement Program               | 23,000           | WS             | Critical          |
| Water Main Replacement                        | 450,000          | WS             | Critical          |
| Hydrant Replacement                           | 10,000           | WS             | Recommended       |
| Lead Service Line Replacement Subsidy Program | 150,000          | WS             | Recommended       |
| Lead Service Line Inventory and Replacement   | 2,000,000        | WS             | Critical          |
| Basement Protection Subsidy Program           | 59,000           | WS             | Recommended       |
| Sewer Lateral Repair Reimbursement Program    | 50,000           | WS             | Recommended       |
| <b>Total</b>                                  | <b>2,992,000</b> |                |                   |

**Each project in the CIP is categorized by the requesting department as follows:**

**Critical-** The project must be completed in the year recommended due to safety or operational needs or as mandated by law.

Critical projects are highlighted in yellow.

**Recommended-** The project will significantly improve operations or safety. The project is strongly recommended for funding in the year recommended or the year after.

**Contingent on Funding-** The project would benefit the Village and improve service levels but is only recommended if funds are available.

|---------|----|---------|-----------------------|
| FY 2024 | \$ | 127,579 |                       |
| FY 2023 | \$ | 135,251 |                       |
| FY 2022 | \$ | 149,349 |                       |
| FY 2021 | \$ | 125,163 |                       |
| FY 2020 | \$ | 113,207 | (including MH lining) |

### **Program Description & Justification**

The purpose of this program is to improve the Village's sewer system and prevent costly repairs associated with failing sewer mains (collapsed, cracked, etc.). The objective is to evaluate the conditions of sewer mains (via televising), identify those in the worst condition, and perform the lining of as many sections as possible. In some situations, sewer mains may have failed beyond the ability to line, and a point repair (or replacement of a section) may be necessary. The Village's sewer system is a critically important infrastructure system.

The Water and Sewer Rate Study completed by Baxter & Woodman in FY 2017 recommends an annual funding level of \$140,000 for this program. This allows the relining of damaged sewer main and the start of a systematic approach to relining all sewers throughout the village, regardless of their condition. The Village is undergoing an update to the Water and Sewer Rate Study, and the recommended funding level may increase in the future as a result.

The sewer lining process includes inserting a sleeve made of flexible material in the existing pipe. The sleeve is then filled with steam or water heated to a high temperature for curing and hardening. This process provides the existing failing pipes with the structural support needed to continue their service and avoid a costly complete replacement. This product has a life expectancy of 50-100 years.

In addition to the typical sewer lining completed each year, Village Staff also identifies locations for manhole lining and bench repairs, if needed. As part of the lining operation, potential locations are researched throughout the winter and work is completed in the summer. This work allows the manholes to be sealed and stabilized without requiring excavation. This work intends to prevent sinkholes and other pavement failures from occurring due to the decay of the interior walls and base of existing manholes.

Since the Village's first sewer lining project, nearly 57,997 lineal feet of sewers have been lined, representing approximately 34% of the total sewer mains owned/maintained by the Village (approximately 171,000 lineal feet).

In 2011, the Public Works Department developed an in-house sewer televising program. Public Works Staff reviews the video recordings, and the sections of failing sewer mains are identified and prioritized. This in-house sewer televising program has identified sewer mains in poor condition that will be lined in the coming years. Extreme weather conditions and the ongoing root growth of trees have accelerated the rate of deterioration of the Village's combined sewers.

The following table identifies the sewer condition ratings, description of condition, and the recommended action:

| <b>Condition Rating</b> | <b>Condition Description</b>             | <b>Recommended Action</b>  |
|-------------------------|--|----------------------------|
| A                       | Random cracking/Some roots               | Continue monitoring        |
| B                       | Medium cracking/Medium root problem      | Line in one to three years |
| C                       | Heavy cracking/Heavy root problem        | Line immediately           |
| D                       | Structural damage/Fully blocked by roots | Requires replacement       |

**FY 2025 Recommended Project**

Specific project locations will be determined during the winter months. Public Works Staff will review all sewer televising completed throughout the year by the Operations Department. Each televised sewer line will be rated with the most severely deteriorated sewers selected for lining. Other sections may also be lined based on the need for a point repair.

**Program Alternative**

Once the pipe's structural integrity is severely affected, beyond the ability to line, the sole option is to perform an open-trench point repair that will require heavy street construction, temporary interruption of traffic flow, and costs associated with restoring the street's driving surface. The preferred and more cost-effective option for improving sewer mains is sewer lining.

| FY 2023 | \$ | 7,950  |
| FY 2022 | \$ | 18,000 |
| FY 2021 | \$ | 28,800 |
| FY 2020 | \$ | 29,270 |

### **Program Description & Justification**

The purpose of this program is to improve the Village's sewer system by replacing failing (collapsed, cracked, etc.) sections of the sewer main (also referred to as point repairs). Staff's objective is to evaluate the conditions of sewer mains (via televising), identify those in the worst condition, and perform relining of as many sections as possible. In some situations, sewer mains may have failed beyond the ability to reline, and a point repair may be necessary. Most point repairs are made on an emergency basis and can be costly. The Village regularly budgets \$35,000 for point repairs.

In 2011, Public Works began an ongoing in-house sewer televising program. Village Staff reviews the video recordings to identify sections of failing sewer mains for point repair.

### **Program Alternative**

Once the pipe's structural integrity is severely affected, beyond the ability to reline, the sole option is to perform an open-trench point repair.

### **Spending History**

|         |    |        |              |
|---------|----|--------|--------------|
| FY 2024 | \$ | 1,122  | (consulting) |
| FY 2023 | \$ | 60,938 | (consulting) |
| FY 2022 | \$ | 87,761 | (consulting) |

### **Project Description & Justification**

Over the past few years yard and alley flooding have become more and more prevalent, along with sewer back-up. In May, 2020 the Village experienced a heavy rain which was followed by a flooding event caused by a significant increase in the water elevation of the Des Plaines River. This event caused significant sewer back-up to residences and led to standing water at various locations throughout the Village.

In an effort to combat increased severity in rain events, undersized municipal sewers and increases in impervious area associated with development, the Village Board recommended that a Stormwater Master Plan (SMP) be created. This SMP would allow the Village to conduct a comprehensive analysis of the Village and to identify areas of concern that may require attention. It would also identify and prioritize Capital Improvement Plan (CIP) Projects that may be implemented to help mitigate the impacts of stormwater on the Village.

The planning stage of the SMP is expected to be completed in FY 2024 and preliminary, future-year expenditures have been identified based on this planning. These expenditures will vary based on more detailed design and cost estimation as well as the Village Board's desired level of protection.

### **Project Alternative**

The alternative is to continue to address stormwater issues as they arise and are made a priority, which does not allow for a comprehensive analysis and solution on a Village-wide basis.

**Project Description & Justification**

The Village purchases all of its potable water from the City of Chicago for general consumption and fire suppression). The water received from Chicago is treated before arriving at the Village’s water distribution system, where it is stored and treated again before entering the water distribution system for consumption. The Pumping Station is where the following components of the Village’s water distribution system are located:

- SCADA (Supervisory Control and Data Acquisition) system: a computer system that monitors and controls various components and equipment
- Three Pumps
  - Pump #1: 100 horsepower; 1,540 gallons per minute
  - Pump #2: 150 horsepower; 2,350 gallons per minute
  - Pump #3: 125 horsepower; 1,750 gallons per minute
- 40 valves
- Four meters: two for incoming water from the City of Chicago (located at an off-site location) and two for incoming/outgoing water at the Pumping Station.
- Water treatment system (sodium hypochlorite)
- Two underground storage reservoirs
  - 2.0 million gallon storage capacity
  - 0.5 million gallon storage capacity
- Emergency generator: backup power source in the event of a power outage (see CERF).

The following prioritized facility improvement is recommended in the next two to five years:

| <b>Repair/Improvement</b> | <b>Estimated Cost</b> | <b>Year</b> |
|---------------------------|-----------------------|-------------|
| 1. Replace Pump #1        | \$125,000             | FY 2026     |
| Total                     | \$125,000             |             |

Pump Replacement - Pump No. 1 should be replaced in-kind. Based on a review of the Village's three current pumps, Pump No. 1 is recommended to be replaced within the next three to five years. The pump capacity is adequate and the pump is found to be well-maintained, however, the overall age of the pump is cause for concern in that its replacement should be planned.

**Project Alternative**

There are no salient alternatives to maintaining the Village's water distribution system as it is the system that provides potable water to the entire community. Deferring these projects would result in emergency repairs that could increase project costs (compared to soliciting bids/proposals).

**Project Impact**

| Annual \$ Impact on Operating Budget | Description of Operating Budget Impact |

| FY 2027 | \$ | - |
| FY 2028 | \$ | - |

### Project Description & Justification

On August 14, 2018, Dixon Engineering Inc. performed a maintenance inspection on the 500,000 and 2,000,000 gallon underground storage reservoirs owned by the Village of River Forest. The purpose of the inspection was to evaluate the interior piping, surfaces, and appurtenances, review safety and health aspects and make budgetary recommendations for continued maintenance of the reservoir. Inspections are recommended every five years.

The following critical and recommended facility improvement should be completed in FY 2025:

| Repair/Improvement  | Estimated Cost | Year    |
|---|----------------|---------|
| Abrasive blast clean the wet interior piping and steel appurtenances on both reservoirs to a near-white metal (SSPC-SP10) condition and repaint with a three-coat epoxy polyamide system. The estimated cost is \$25,000. Best pricing can be obtained if work is performed with another tank painting project. | \$25,000       | FY 2025 |
| Total   | \$25,000       |         |

### Project Alternative

There are no salient alternatives to these improvements and maintenance projects as the water reservoir is a critically important part of the Village's water distribution system. Deferring these projects would result in emergency repairs that could increase project costs (compared to soliciting bids/proposals).

### Spending History

|         |          |  |
|---------|----------|--|
| FY 2024 | \$10,000 |  |
| FY 2023 | \$0      |  |
| FY 2022 | \$0      | costs incorporated into AMI project                                |
| FY 2021 | \$6,661  | continuation of program to replace all meters over 20 years of age |
| FY 2020 | \$21,290 | continuation of program to replace all meters over 20 years of age |

### Program Description & Justification

This program aims to improve the metering accuracy of Village-owned commercial and residential water meters. Water Division employees tested meters in the 15 to 20 year age category and found some did not meet AWWA (American Water Works Association) standards for meter accuracy. Although not a standard, studies recommend replacing residential water meters every 15 to 20 years. Water meters can be damaged and deteriorate with age, thus producing inaccurate readings. Inaccurate readings will give misleading information regarding water usage, make leak detection difficult, and result in lost revenue for the system. Funds requested over the spreadsheet total below are for accessories associated with meter replacements (nuts, bolts, gaskets, seals and sealing wire, flanges, and meter couplings). In FY 2025, the Village plans to replace 68 meters/chambers at a cost of \$22,874 plus nominal cost of additional equipment. Future years account for anticipated cost increases for meters/chambers and the increase in quantity needing to be replaced in those years.

| Qty. | Size  | Ea.                | Cost        | Fiscal Year | Meter Quantity |
|------|-------|--------------------|-------------|-------------|----------------|
| 14   | 0.625 | \$141.00           | \$1,974.00  | FY 2025     | 68             |
| 12   | 0.75  | \$158.00           | \$1,896.00  | FY 2026     | 84             |

| 0    | 3     | \$1,900.00         | \$0.00      |             |                |
| 0    | 4     | \$3,250.00         | \$0.00      |             |                |
| 0    | 6     | \$5,580.00         | \$0.00      |             |                |
| 17   | 1.5   | \$425.00           | \$7,225.00  |             |                |
| 3    | 2     | \$445.00           | \$1,335.00  |             |                |
| 0    | 3     | \$1,415.00         | \$0.00      |             |                |
| 68   |       | <b>Meter cost</b>  | \$22,334.00 |             |                |
|      |       | <b>Add'l Equip</b> | Nominal     |             |                |
|      |       | <b>Total cost</b>  | \$23,000.00 |             |                |

### Program Alternative

As the Village's water metering system is critically important as a source of revenue, it is vital to plan/budget for replacing water meters that have reached or exceeded the end of their useful service life. The primary alternative to this program is to not budget/plan for water meter replacements and respond to metering failures and inaccuracies as they occur. An alternative to the Village incurring the costs of the new meters is requiring that the building/property owners incur a portion or all of the new meter costs.

| FY 2022 | \$ | -       |  |
| FY 2021 | \$ | 575,000 | (FY 2020 and FY 2021 Projects both completed in FY 2021) |
| FY 2020 | \$ | -       |  |

### **Program Description & Justification**

This program aims to improve the condition of the Village's water distribution system by replacing aging and deteriorating infrastructure or by installing new infrastructure where a need becomes apparent. This approach helps reduce costly water main breaks and the associated water loss. The Village's water distribution system is a critically important infrastructure system.

The Village has approximately 40 miles of water main. The majority of the water mains are between 50 and 80 years old. On average, there are approximately seven water main breaks per year. It has been proven that as water mains become old and reach the end of their useful lives, performance deteriorates and results in high maintenance costs, loss of hydraulic capacity and water quality, and a significant increase in customer complaints. The AWWA recommends replacing one percent of the distribution system every year.

Each year, Village Staff analyzes failing or problematic sections of water main to determine the need to replace specific water mains based on history and number of breaks, outdated size, or any other defective condition. This analysis is reviewed along with all identified needs for improvement based on the Water Distribution Model Report performed by Strand Associates Engineering in 2018.

### **FY 2025 Recommended Projects**

The proposed project for FY 2025 includes the installation of an 8" water main on two of the remaining four alternating blocks of LeMoyne (from Jackson Avenue to Monroe Avenue, from William Street to Clinton Place and from Bonnie Brae to Harlem Avenue) as identified in the 2018 Strand Water Distribution System Modeling Report.

The cost estimate for this project is as follows:

- \$410,000 for construction
- \$40,000 for project engineering (design and construction)

**Future Water Main Projects**

Staff reviews the modeling report and evaluates the Village’s water distribution system and trends in water main breaks annually to identify and prioritize future projects. Staff has identified the following water system improvement project(s) for possible future fiscal years:

- FY 2026 - \$500,000 for water main improvements

**Program Alternative**

As the Village’s water distribution system is a critically important infrastructure system, it is vital to plan/budget for replacing water mains that have reached or exceeded the end of their useful service life. The primary alternative to this program is to not budget/plan for water main replacement projects and respond to water main breaks as they occur, which could lead to more significant budget impacts.

| FY 2020 | \$ | -      |           |

**Program Description & Justification**

The Village’s fire hydrant system is a critically important infrastructure system. The Village owns and operates approximately 446 fire hydrants. The purpose of this program is to maintain all of the Village’s fire hydrants in excellent operating condition. The Village’s Fire Department conducts a Village-wide hydrant flushing program each year. During the hydrant flushing events, Fire Department personnel identify hydrants in need of repair and provide a list of those hydrants to the Public Works Department to coordinate and/or make the necessary repairs. Hydrants that are not in operating condition or are identified as being too low for proper operation are prioritized for immediate repair or replacement.

**FY 2025 Recommended Project**

The Public Works and Fire Departments identify hydrants as operational but “too low” (less than 18 inches from the ground to port), which prevents the hydrant wrench from rotating freely around the main/steamer port and slows the time required to connect the fire hose to the hydrant. Hydrants with a low flow rate due to a small supply line are also identified. Each year Village Staff attempts to replace these hydrants to eliminate any that do not operate efficiently or provide high flow rates. Public Works staff can often "rebuild" existing hydrants instead of replacement. This process involves the replacement of the inner workings of the hydrant and is more cost-effective than a complete replacement.

**Program Alternative**

The Village’s fire hydrant system is critically important infrastructure. It is essential to budget for replacing hydrants that have reached or exceeded the end of their useful service lives. The primary alternative to this program is to not budget/plan for hydrant replacement and make more costly emergency repairs.

|         |    |                     |
|---------|----|---------------------|
| FY 2024 | \$ | 155,000 (Projected) |
| FY 2023 | \$ | 155,000             |
| FY 2022 | \$ | 146,274             |

### **Project Description & Justification**

Beginning in FY 2022, the Village increased its efforts to remove lead from the water system by creating a reimbursement program for property owners who choose to electively replace lead water services. In the first year, it is projected that there will be more than 20 property owners who have completed this work as part of the reimbursement program.

A portion of the reimbursement is made at 100% for the Village-portion of the water service and 50% for the property-owner-portion of the water service. Additional costs such as permit fees, interior plumbing modifications (related to the water service replacement) are also reimbursable at 50%. The maximum reimbursement per property owner is capped at \$7,500.

Previous funding levels of \$50,000 have been exceeded by roughly triple in each fiscal year. Staff recommends an annual funding level of \$150,000, which will allow for the replacement of 20 lead water services based on average reimbursements issued so far. Additional funding sources will continue to be researched to further supplement this current effort.

### **Project Alternative**

The alternative is to require property owners to fund lead water service replacements 100% without providing any funding assistance from the Village or for the Village to replace the lines.

### **Project Description & Justification**

In August 2022, the Village of River Forest submitted its “Lead Service Line Replacement Program - Project Plan Report” to the IEPA. The Plan was approved on March 31, 2023. The Village is continuing to inventory all service lines to identified which ones are lead. Year one of the five-year plan is expected to commence late summer of 2024 and include the replacement of approximately 150-200 lead services. The initial year will work to replace known lead service lines on private/residential property at locations where the water main and service line within the right-of-way have already been replaced with copper. The Village intends to utilize a low interest loan from the State to fund this project.

### **Project Alternative**

There is no alternative. The State mandates replacement of all lead service lines by 2042.

| FY 2020 | \$ | 25,710             |

### **Project Description & Justification**

In 1995, the Village initiated a subsidy program to help provide financial assistance to property owners interested in installing flood-prevention infrastructure. The intent of this program is to offset a portion of the expense that a property owner will incur when safeguarding their building from sewer back-ups. The following projects are eligible for the subsidy program: overhead sewer connection, modified overhead sewer connection, and backflow prevention valve.

Depending on the location of the property, eligible expenses are reimbursed at different rates. Three zones have been established, based on the frequency of sewer backups and other criteria, with the respective levels of funding as follows:

- 1) Standard – 50% of eligible costs are reimbursed up to \$4,000
- 2) High Risk (HR) – 80% of eligible costs are reimbursed up to \$6,000
- 3) High Risk Low Access (HRLA) - 80% of eligible costs are reimbursed up to \$7,500

Costs such as permit fees and work directly related to the excavation and installation of new infrastructure are eligible for reimbursement. The reimbursement per property owner is capped based on the zones outlined above.

Staff recommends an annual funding level of \$59,000, split based on the zone:

- 1) \$32,000 for Standard
- 2) \$12,000 for HR
- 3) \$15,000 for HRLA

This allows for approximately 12 flood prevention infrastructure installations, based on average reimbursements issued so far.

### **Project Alternative**

The alternative is to not provide any funding assistance from the Village.

| FY 2023 | \$ | 25,700             |
| FY 2022 | \$ | 36,650             |

### **Project Description & Justification**

Beginning in FY 2022, the Village created a subsidy program to help with the cost of repairing structural damage to sewer lateral lines within the roadway at residential properties.

The reimbursement for structural damage repairs is a 50% match. Costs such as permit fees and work directly related to the excavation, sewer lateral replacement, and roadway restoration are eligible for reimbursement. The maximum reimbursement per property owner is capped at \$7,500.

Staff recommends an annual funding level of \$50,000, which will allow for the replacement of approximately 7 damaged sewer lateral lines.

### **Project Alternative**

The alternative is to not provide any funding assistance from the Village.
