

Comprehensive Plan Update

The Village's Plan Commission, Village Board and Staff have undertaken a nearly year-long process of updating River Forest's Comprehensive Plan. The existing Comprehensive Plan, which was last updated in 2003, is the official policy guide for land use and development. It also sets forth long-range recommendations for the maintenance and enhancement of the community as well as desirable improvements, developments and redevelopments in selected locations.

Community input is critically important to the process of updating the Comprehensive Plan and residents will have ample opportunity to share their thoughts through surveys, the [project website](#), community meetings and events, and more. Residents can also use the [map.social](#) tool to create maps of the issues and opportunities facing River Forest.
